Thread: [IP Skype Grabber](#)

marc1 - June 10, 2018, 1:02 am

Hi Guys,

Any solution to get the location of a Skype user since Skype resolvers are not working anymore?
Or do you have any Skype resolver that is still working?

Thanks,

Marc

OmgltzBrecht - June 10, 2018, 5:28 am

Skype deob or ip sniffing still works on older accounts the new live: accounts can't be resolved.

Gametrusion - June 10, 2018, 7:41 am

Yep it doesn't work for the new live: accounts

Vuln - June 10, 2018, 7:57 am

You can use one of many free services to generate an IP logging image or redirection URL. You often don't even need to register.

Just google "ip logger" and click on the first result. I tried to share a specific website, but it is censored on HF.

marc1 - June 10, 2018, 9:36 am

Thank you guys!

Can someone tries any solution of the above?

Can you please try to grab the location of any of your contacts on Skype?

Unfortunately none is working with me:(

Thanks again!

Cheers guys!

macspeed - June 10, 2018, 9:39 am

please enlighten more, or PM me the link, you can post it here with separation

Zens - June 10, 2018, 9:43 am

use ip logger type it and google'ed it

marc1 - June 11, 2018, 4:31 am

Hey Again,

Let me tell you exactly what is my current situation...

I have a contact on my Skype account who's blocking me and i need to get his IP address/location.
Sorry, i am not an expert in these things, that's why i am asking you about the exact steps of each solution that you are suggesting.

In case, the IP logger can solve my issue, what are the exact steps that must take?

Hope i made myself clear.

Thank you guys!

Cheers!!

OmgltzBrecht - June 11, 2018, 10:00 am

U can check on db's of resolver site's maybe he's skype was resolved be4.

Damasu - June 11, 2018, 5:10 pm

Use an ip grabber link, way easier, just get them to click it

TimothyThechOSEN - June 12, 2018, 12:11 pm

Use wireshark find a tutorial on youtube how to use

Ian Pooley - June 12, 2018, 12:57 pm

IP logger is the easiest & convenient if the guy has a live: Skype. May need a bit of "Social Engineering".

Not sure if Wireshark is functional with this; but I'd recommend to research a bit.

If you are lucky, try to check if there are any alternative Skype ID's he previously had and resolve that as well.

DOOMSDAY204 - June 14, 2018, 4:27 am

just get into a call with them and use wireshark
