So you have to provide all your own accounts and proxies, correct? Either that or have the bot create/scrape them for you.

Do scraped proxies paired up with newly created accounts actually work though? I would imagine it's a good way to attract Reddit's attention and get your accounts banned but maybe I'm wrong. Or is this more useful for just creating a burner account, posting something, getting it big real quick, and letting everything get killed shortly after?

Hi -

You can provide your own proxies or accounts if you want, however the bot can create accounts for you, and it also scrapes proxies from the internet.

New accounts tend to have around 40-50% vote retention, however with methods I use after the first week I tend to get 90% retention, but the methods are something I'd discuss with customers.

I do everything I can to help bypass Reddit anti evil team. My recent customers are having no issues at all on this front.

Thanks ?

Added all the vouches so far to the OP ? ?

jackass23 - June 23, 2018, 12:49 pm

Got the panel a few days ago, and it works as intended.

You must be somewhat familiar with Reddit and their algorithms or your posts will rise and then fall quickly.

The trick is to start slower than you would think, whether it be comments or upvotes, and try to attract natural votes to your post, once it raises near the top.

Every subreddit is different so you will soon learn to realize this.

However fresh accounts created in the panel give a very good percentage of upvotes which is very surprising and shows that he is doing something great here.

The cost is not as expensive as you would believe, you do not need to get your own VPS, and you do not have to get your own proxies. Those would run about \$40/mo for a solid VPS and good proxies.

Thanks for such a solid bot Castro, and look forward to continued use with it.

SIM-1567847 - June 23, 2018, 1:28 pm

Hey Castro if you can do a lower price for me that would be great.

Just need my usual upvotes every now and then.

Castro didn't hesitate to give me a free trial, thank you Castro! It really takes just a few minutes to realize that this is the best Reddit AIO Bot/Panel at the moment. It indeed is one of its kind and works flawlessly, simply as described by the creator. If you know the potential that Reddit has, and you want to use it for yourself, I highly recommend everyone to get this panel/bot, at least give it a try while you can. Thank you for the amazing job Castro!

2 spots left is for how long time?

Also, for subreddits that check so you don't upload same picture, will that be fine? Can he does links as well?

And last question. Can I post on subreddits from 2 different accoutns? So account A posts 2 stuff and account B posts 2 stuff?

A) Might upper limit spots to more experienced members, so we will see.

B) If you read the features on the thread OP, this doesn't post on subreddits, it can upvote, downvote and comment on posts and comments, along with much more.

// Version 1.01 Released //

This was originally going to be July 1st Update, but decided to release it early!

Change Log

Changelog// Downvoting enabled

// To downvote just change the "direction" drop down menu on "tasks and statistic" tab

Enable/Disable proxing scraping/checking & account ban checking

// This is located in the "other" tab, bot will still check brand new proxies that they work, and brand new imported accounts that they work

Delete previous tasks from DB

// Delete button on "task and statistic" tab

Custom comments

// Go to "scraping" tab, import them from .txt, there is a template file for you to try

* Custom account creation < set word pool

// Go to "accounts" tab, press "configurate words pool" there you can import .txt word pool, use template format, bot will randomly select from this word pool for usernames

Decided that I'm selling 8 more panels, this will be my maximum number of users I can support, after this sales suspended until a monthly subscription becomes available.

Thanks for answering what I'm saying is :

I have no problem in using your tool to create like 1k new accounts but my question is what you mean by bypasses vote fuzzing ?

vote fuzzing can be a game of numbers , I mean I'm totally experienced with reddit and when I create new accounts I can get a new post on a subreddit to 1k upvotes but it just stay in the new section , never get to top or even to rising area . so will your tool get us effective upvotes that will take the post to the front of the subreddit when we use new accounts or it's just about number of upvotes ?

thanks for your time

I'd love to take a look at the video if possible. It sounds interesting.

Xtrem3 - August 4, 2018, 10:24 am

Can u send me the video and trial plz? Also what can this be used for? What subs does it post to? Won't my IP get banned?

Hi - I've sent you the video lihnk.

What can this be used for? Read the OP - it tells you what features the bot has.

It doesn't post to any subs, it can post comments, it can upvote, downvote, make accounts. It uses proxies so your IP won't get banned.

Read the OP cos all of this is explained there.

What I was asking was that if I post a video or share some post, how would I be able to drive the traffic to my website? Don't think Reddit allows any advertisement..

Two panels have been sold, they said they would leave review but don't have enough post prestige.

I can give trial access to serious buyers.

PM/post here.

this and i would like to see the video aswell. thanks! :)

What else is needed for this? Do we need to buy any accounts, proxies, etc? Is this a all in one panel? Buy access and you're good?

I load about 100 accounts for you, for free. The bot scrapes its own proxies...you just need to keep the accounts topped up if they get banned, if you have a 2captcha account it will cost about \$5 for 1000 accounts...the bot creates accounts for you ?

Spaces are full ATM until a couple of days - PM me to get on waiting list.

Okay so I would need 2captcha as well then? And it can only use 100 accounts at a time?

No, I will load 100 accounts for you, you can have unlimited accounts, but you will either have to create them (using the bot) or import your own ones.

Online taking sales

Castro - November 11, 2018, 4:54 am

Been sick this week, sales will be open again soon. PM to discuss.

Still feeling pretty shitty but taking sales, 2 spots left open for this month :)

Castro - November 19, 2018, 7:59 am

Had a few sales over the weekend.

Open to sales right now:)

Castro - November 27, 2018, 1:50 pm

Replied to all PM's regarding this. Anticipated to be changing server supplier soon, so I can push this update :)

10% discount now until the end of December.

Castro - December 2, 2018, 10:46 am

New servers are being pushed soon, scrapping digital ocean after the troubles ive had there.

Online :)

Online, working on update before Xmas hopefully.

DeadJames - December 19, 2018, 1:34 pm

This person here is OUT OF HIS MIND! He's selling something so overpowered for so cheap. I would definitely not hesitate to buy. I may purchase this in the future.

Everything works PERFECTLY with ZERO errors. I tried UPVOTES, DOWNVOTES and talking about help!

I think his slowest reply for help was one minutes which is actually very IMPRESSIVE.

SUPPORT 10/10 [Really. He wont give up on you if you need help. Just do not ask self explanatory questions. E.G. "How do I make a reddit account?"]

DESIGN/AESTHETICS 9/10 [There's just a little push needed for the website design but it's not bad.]

SPEED 10/10 [Probably the fastest speeds to upvote/downvote you'll find. I would suggest this is the BEST in the market so far.]

OVERALL 9.5/10 [As I said some work may be good on the design but if that's how you like it, it's fine! Works SEEMLESSLY]

Welp Thanks! TTYL! Love ya'll.

EDIT: [Vouch btw]

Will be suspending sales after this month, Reddit have upped their game & having more users will make it more difficult to bypass their ban prevention.

Thanks. January 31st will be the last day of sales.

urk - January 31, 2019, 9:20 am

check your messages. thanks

Castro - March 3, 2019, 6:02 am

Sales have closed. It will not be sale publicly until at least this summer. Using it for private use.

Thanks to all customers.

Reopening sales to this, slightly different than the last version but more reliable.

If anyone is interested then PM me and we will sort a contract.

Stanley - December 24, 2021, 9:37 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

could you maybe make a new sales thread with what it has now? i think that would help people better decide to buy it
