Thread: [Cheep rat setups](#) | [Stub encryption](#) | [Spreading methods](#)

nicehash - June 12, 2018, 12:42 am

Hello people of hackforums

Why i'm making this thread:

[-] I'm making this thread for anyone who needs help setting up and using a rat.

[-] I work with rat's for quite some time now, and i'm at the point now where i'm actually really good at ratting.

[-] I thought since i have a good amount of time and effort put in to rat's i'd share some of my knowledge with you guys.

What i will do for you and what it will cost you:

[-] I will help you set up one rat for \$5,- and two for \$10,-.

[-] If you want to i will give you my best spreading methods for just \$3,- extra (this can also be sold without the rat setup).

[-] I will encrypt your first 5 working stubs for you for \$5,- extra (this can also be sold without the rat setup).

[-] I will keep contact with you untill you tell me that you get it.

What do you need:

[-] You need to have a VPN that can port forward (i reccommend cryptic vpn), or knowledge on how to port forward on your router.

[-] A bit of respect and patience as i will get you through it.

Accepted payment methods:

[-] BTC

[-] ETH

TOS

[-] I am allowed to turn down anyone i don't want to help.

[-] I am expecting respect, if you start to disrespect me i will break contact with you.

[-] No refunds.

Well that was all if you want any of the services listed above feel free to contact me through pm,
Have a nice one!

?
