Thread: [How to make money with RAT slaves](#)

TimothyThechOSEN - June 12, 2018, 12:09 pm

I want to start hacking but don't know how to make money from it

licker98 - June 12, 2018, 12:30 pm

steal things and sell them, mine alt coins from a botnet, sell accounts, sell bots etc etc

MicroCode™ - June 12, 2018, 12:32 pm

Exactly! You can dig up shit, which is valuable, and use/sell them.

It's all about knowing what to look for, what does sell, and where to sell it afterwards.

int - June 12, 2018, 12:46 pm

steal their accounts, install adware on them, sell your bots

Viotto01 - June 12, 2018, 1:32 pm

Go back to school and find a real job, instead of robbing from people.

I think that would be the best way for you fam ?

asmy - June 12, 2018, 8:51 pm

mine coins like BTC and LTC

every 1000 bots maby can make 12 \$ per day

ashwathama - June 13, 2018, 3:25 am

BTC and LTC on an PC?

I guess XMR will be a better option.

Well see Bitcoin is not processor friendly,it requires special Application Specific Integrated Circuit (ASIC) to mine profitably*.

But in case of XMR the Cryptonite algorithm is specially designed for mining on a personal computer or a laptop , moreover XMR (monero) does not support ASIC chips.

crazy_command3r - June 13, 2018, 9:15 am

I think the best way to make money is with Adwares and bitminers, if you are lucky with bank accounts too.

i see it, so XMR is better than BTC or LTC for home computer and laptop

thanks for help
