Where to get cheap VPS? <http://lowendstock.com>

DOMAIN > DNS > SLAVE NODES > MASTER SERVER (HOW IT WORKS FOR PUBLIC)

SLAVE NODES > DNS > MASTER SERVER (YOUR DEDICATED SERVER OR VPS WHERE YOU'LL HOST THE FILES) (HOW IT ACTUALLY WORKS)

How the IP changes (Checking How FastFlux Works?) ([Click to View](#))

How the Installer Works (Slave Installer Demo Server1) ([Click to View](#))

How the Installer Works (Slave Installer Demo Server 2) ([Click to View](#))

How the Installer Works (Slave Installer Demo Server 3) ([Click to View](#))

How the Installer Works (Demo of Monitor vNODE) ([Click to View](#))

There won't be any vouch copy because this is one of its kind in the market. The package comes with 4 Installers in the Advanced Package (Slave) (Backend) (8ncDNS) (DNSSlave) and 2 Panel (Fastflux Monitor vNODE) (Fastflux Master Panel) and the demo consist of only one installer so do not worry, you are not paying for one piece of code but a bunch of codes.

### TERMS OF SERVICE

License will expire at IT'S PACKAGES due but the - Slave Node + Master Node + vNode Panel + Master Panel and the installed FastFlux DNS servers will remain active until all the nodes are destroyed/abused/closed/terminated from its source datacenter. Only the code will stop working after the time spawn provided for the packages respectively.

You will be provided with a login to the FastFlux Master Panel. Inside the panel you'll need to provide the MASTER NODE IP /s and 8ncDNS SERVER IPs so that the system will initiate the installation of SLAVES routing for that particular Master Node server or 8ncDNS SERVER. If in any case the installer fuse doesn't work, you'll be provided full support and extended access to the installer so do not worry of your subscription time and money getting wasted.

If you try to temper with the code your license will be revoked and you won't get a second copy no-matter what you did.

Pre-Sales are open now, working on a sales thread, get this before I start selling it for \$500!

I don't think there is another good deal as it will save you big bucks, instead of buying from small fries who sell fake offshore servers, you will get something handy.

Minimum 4 Servers required (only DNS rotator)

This is for rotation that means the IP's change every 5/10/20 minute i think this is option it is not to much primary to use it...

Rotation means your IP will change every one second. I'll update with proof soon.

You are a hosting client, not a FF setup client. Anyway, sent you the refund to your way. Whatever, make sure to post on the correct section.

Did you purchased fastflux auto setup installer script? Or did you purchased hosting? 8 Months ago, our service got taken down by SPAMHAUS reports because of domain getting added to DBL (domain block list), took a great amount of time and work to bring it back up.

Well, if you forward me your email, I will look it up and we will issue you the ordered service and for double or atleast 175% of the original subscription time. I hope you forgive this inconvenience caused and excuse my rudeness and PM me back your email ID registered within our website.

Warm regards.

Edit: If I am mistaken and you brought a trial package for this service, then kindly forward me the txid or email received after the order was placed so that I can find the order id and help you out as soon as possible.
