Thread: [Bitcoin Clipboard stealer removal](#)

brainfix - June 13, 2018, 11:26 am

Hello guys, my machine is infected with Bitcoin Clipboard stealer (copy paste bitcoin virus) I cannot remove it with malwarebytes or avast. Can anyone give me advice on how to remove this?

Niko - June 13, 2018, 2:43 pm

First off this thread should belong here - [Malware, Rat, and Virus Removal](#)

But before that,

Please download [Farbar Recovery Scan Tool](#) and save it to your Desktop.

Note: You need to run the version compatible with your system. If you are not sure which version applies to your system download both of them and try to run them. Only one of them will run on your system, that will be the right version.

Right click to run as administrator. When the tool opens click Yes to disclaimer.

Press Scan button.

It will produce logs called FRST.txt and Addition.txt in the same directory the tool is run from.

Please copy and paste the on your new thread.

Post the logs on a new thread in the proper section, then wait for a trained person to go through them.
