Thread: [Selling high-end bots without exploit kit](#)

19726273812 - June 14, 2018, 2:02 am

A beginning

I am selling a bot. This is my second post and I will honestly sell the product to my customers.

About bot

I collect the bots by hand without using the exploit kit.

I also bought a bot using an exploit kit, but based on my 24-hour survival rate of 10% (I bought 100 dogs, 78 bots are shipped, and only 10 bots survive after 24 hours). So I collect the bots by hand.

I think the problem with the exploit kit is as follows.

- Because the exploit kit is aimed at a computer with very low security, I think that even if it is infected by a virus, it is infected with another person's virus again by an exploit kit.
- chrome sandbox
- Removed bot by botkiller if attacking already infected computer

Since I mainly target high-end PCs, my bots are very high quality hardware than other bots.

When you contact me, I may not have any bot inventory left. I will then gather the bot back and contact you.

We will provide the best service.

Thank you.

I sent jabber to PM.

Lextian - June 21, 2018, 12:27 am

Posting here to find when am ready to test this out.

PM if its truly Quality bots. then it should start with \$1 per 1 bot.

let me know if you have anything like a test bot ?

int - June 24, 2018, 6:06 am

Nice, I agree with the exploit kit thing. Most of them target internet explorer, and literally only bots use that.

A Kitty - June 24, 2018, 1:27 pm

Vouch for this guy! His bots are very high quality!

scubasteve1234 - June 24, 2018, 1:35 pm

Commenting to come back later
