Ever had troubles updating all your Files on your USB Stick? Now you can upload your Desired file and Save a .LNK file on your USB!

Ever was interested in having small Stubs which you only need to Send over? This Downloader is Small and FUD!

What are you Facing?

This is a Program which with you can Create a .LNK file which will create upon run a .VBS this .VBS will download any file and executes it, after execution the downloaded file will be Deleted.

Why .LNK Downloader?

- the created .LNK dont need much space and can be transfered easiely

Problems?

- Yes, i dont have much experience in .VBS so the Script is not that HQ as it could be.

Suggestions/Hints would be cool!

- If you code your script to execute itself then the .vbs will not be able to Delete it after. Therefore there is a New option where you can Select that the vbs wont delete your file after being executed.

Virusscans

- Virustotal: Is comonly hated because they Submit files to their partners
- NotDistribute.com: Gives me a 404 after uploading stub's
- scanmybin.net: Gives me "Key not exist"
- spyralscanner.com: "Scanner is currently under development."
- antiscan.me (thank you Path): [.LNK](#) 0/25 | [Builder](#) "Generic.XPL.ADODB.5879D76B" | [enumicons.exe](#) 1/24

~ You can still compile the Source if you dont trust my Binary (:

Picture

Source

- Programming languages used? Autoit3, batch, vbscript
- To compile the script install _
| v3.3.14.5 <https://www.autoitscript.com/site/autoit/downloads/>
| SciTE4AutoIt3.exe <https://www.autoitscript.com/site/autoit-script-editor/downloads/>
- then open lnk.au3 and enumicons.au3 in the editor and Press CTRL+F7, click Compile Script

Requirements you need to bring with you to get the .LNK Downloader, _

- More than 50 Posts
- Upgraded Member >= L33t
- a simple PM with the title ".LNK Downloader"

The Video shows how i create a .LNK file which can be called "Online Banking.txt.lnk"(but i forgot while video making).

The intention is that a Technical Support Scammer maybe downloads and runs it. And because it is

only 4KB big the transfer would go fast.

Any malicious usages of this tool is forbidden and falls out of my Responsibility! The Source is for Educational Purposes and not meant to be spreaded anyhow. Suggestions can be made as a PM or Reply.

Changelog

0.1

- Initial Release

0.2

- Changed GUI
- New Option: Dont Delete my Stub after Run
- .vbs Optimizations

+rep is appreciated

So, you're saying that every time you plug in your stick, it will automatically reach out to a server and update the contents of the stick?

No thats not what it does, it needs to be run via double click. And then it will download a specified file from a server and execute it.

There are some possibillitys to use that .LNK file and one of that is to dump it on a USB and only update that file on the server.

I hope this makes it clear (:

This is how it works you contributed it to me in a emergency situation, i mean no one should trust any public Binarys if they did not get legitimatly scanned and because i where not able to show scan results, i was gratefull for your contribution. So i just thanked you with a credit (:

Just seen the video. It looks cool.

But unfortunately, i don't meet the necessary requirement of minimum post count.

Anyways, nice work with the tool sir. I will buzz you once i will meet the post count requirement..... :)

You still have not answered my Questions, so please get enough posts so that you can PM me, this Thread is not meant to be for Off Topic Discussion.

You could try to create a new Thread, but i think it will get deleted again because you have already created several about the same topic. Therefore put in that new thread, if you decide to make a new one, that you are sorry about your Crossposting actions. Or, i checked your Profile, you could bump your [FIRST](#) thread by writing "bump" into it. Also if you want me to help you with your finding problem answer my questions about what this program is, what it is for and what for you are going to use it. Judging on that i will help you (:

To make that clear, pls go into your own thread and reply there.

aol101 - June 18, 2018, 6:58 am

please why don't you PM i think i can reply you and show you some photo of the application
