That will be dependant on the software you install. I do not provide a rat.

no problem D:

i have rat for this.

Ok tell me when you ready.

iMirXa™ - July 9, 2018, 4:50 am

I am interested but would love to see it in action because from what i saw there was only 1 bot without any proof or anything.

Is it still working?

Does this method avoid installation and everything and directly run your apk and gets you bots?

What if the bots are dropped after one use because of method.

I will check to see if it is still working but i cannot see any reason why it would not :),

The reason there is only one bot is because i dont need any and was purely showing i can get bots by installing a RAT. You can install anything you wish.

I provide the know how on getting it in to action.
