Thread: [HF throwing captchas more frequently?](#)

Crystallize. - June 16, 2018, 7:04 pm

Uhm IDK if its my WiFi restarting itself and assigning me new IPs or HF is throwing me long captchas to solve every 2 posts.

Is anyone else experiencing this or it's just me?

Jimmie - June 16, 2018, 7:05 pm

I had the same issue earlier it took me 5 minutes to complete the security check captcha.

It's your country of origin. Currently it's set for more security. You have to endure it for now.

Ahh gotcha.Is this part of CF or HF? If it's CF I could make a request on them to look over my country.

Pretty sure Omni has set it himself to have more captchas for your country. It's the site settings in Cloudflare I'd say.

CyberError - June 17, 2018, 3:36 am

hmmm i having same issue fews day ago , now its seem to be okey , i mean i have to do Captcha every 3rd time on open thread/post

AeroBlue - June 17, 2018, 9:04 am

I live in the US and I get it every time I refresh it's getting really tedious...

Hopsin - June 17, 2018, 9:09 am

I think (I might be wrong) that captcha security get triggered if I remember correctly. It used to show me too (long time ago) and it pissed me off (every minute captcha for no reason) so I left HF to cool down. After I returned few months later, It disappeared. Hopefully, It won't show up again. Too frustrating. Anyway, have a nice day!

meister - June 17, 2018, 9:10 am

Same here. Constantly triggers.

Jake???????????????? - June 17, 2018, 2:04 pm

same, east side US and i get these quite frequently

???? - June 17, 2018, 2:11 pm

I get them a LOT when using mobile recently. When I'm on the computer it works just fine though. Does it have to do with the state that I'm in? :(

XmysteriousX - June 17, 2018, 6:28 pm

Same here every time i open it

Grim - June 17, 2018, 10:02 pm

Mine aren't too bad only if I go on mobile. but there not every post its only when i log in that i am seeing it.

Condoms - June 17, 2018, 10:04 pm

I never had to select so many pictures that include signs in a minute before...

Linux. - June 22, 2018, 9:59 am

Yeah, I live on the east coast and I get these nearly every reload now... Really annoying sometimes, sometimes I have to rewrite posts, messages, etc because of the captcha.

DENIZ - June 22, 2018, 4:22 pm

I barely get any captchas. Most of the time it's enough to tick the checkbox and it instantly redirects me to the page.

This shit is fucked up.

Xycon - June 22, 2018, 4:27 pm

I pretty much don't get any.

Unless I am using a VPN in the background to download stuff with and happen to connect to HF in the meantime, it asks me only once. Same goes when I drop the VPN connection and visit HF with my original IP again, it asks me once and thats it, back to neverland.

Motusora - June 22, 2018, 5:17 pm

got a lot of them as well before when sending messages and approving contracts ,
now it works fine

Bluffer - June 22, 2018, 6:05 pm

I get them mainly when previewing a thread edit.

webdev77 - June 22, 2018, 7:33 pm

I've gotten them occasionally but nothing too obnoxious. Usually just on first site visit. If that's what it takes to keep the site running smoothly then so be it.

jordan0159 - June 23, 2018, 1:40 am

I legit don't even think I've ever gotten one of these aside from when signing up. I live in the UK though dunno if that matters.

shmakrbrakr - June 23, 2018, 2:26 am

Change your proxy/vpn(IP) if you get a lot of captcha requests while simply browsing the web.

meister - June 23, 2018, 2:57 am

Way too many captcha request

Doc- - *June 23, 2018, 11:09 am*

I can not even start a new Contract due to these stupid captchas. Everytime that I fill them out after submitting/updating a contract I get redirected to the "Public Contracts" page.
