Want to report that I can't see anymore urber's color for online users.

All are white and yellow.

Also I can't access to the ban page to see banned users

Ctrl + F5 to clear your cache, if that doesn't work just clear it through your settings.

And the bans.php page permission has been removed from UB3Rs

It's happening to mostly everyone, just like the above user suggested its an issue with cache, just refresh and it'll fix itself.
