DEMO VIDEO: <https://vimeo.com/275744602>

Tutorial for how to fix "black bars" (made by one of my customers!):

<https://hackforums.net/showthread.php?tid=5860253>

START A CONTRACT

I'm only selling 100 UDID slots. FOR THE LAUNCH, AND A LIMITED TIME, IT IS ONLY 20\$. It's impossible to redistribute this app, since I'm individually authenticating accounts. Due to the nature of how I did this, It can never be patched. Never. If you have five Snapchat accounts you want to use this from, you will have to buy five auths. That's just how this work. As far as I know this is the only way to do this. It's not a "method", it's an iOS app I developed.

PLEASE NOTE, it's somewhat of a process to get this setup since I'm distributing the app OUTSIDE of the App Store. I need to register your UDIDs manually (super easy to find your UDID), and then distribute the app ad-hoc to you. It's a really easy process, but a process nonetheless that requires 5-10 minutes of patience.

ewhores are going to have the time of their life with this. Great idea man you are about to roll in some cash.

Kash Studios - June 17, 2018, 4:54 pm

But Snapchat ++ does this already on the iOS? How is this any different.

thanks my man! I guess this would be of benefit to other users too who just wanna flex fake photos or something.

to all people reading this, I can't sell RIGHT away since I have to archive/build my iOS application and upload it somewhere before I codesign it with xcode!

YOU CAN TEST BEFORE YOU BUY (if you're serious).

Deleted my original post due to error but as I said this would be perfect for fellow e-whorers like me or anyone else. I dont know about that price to be honest but maybe after a couple legit positive

reviews ill consider buying.

Kway - June 18, 2018, 2:46 am

OP sent me over the program first to test it and I can can confirm it works and posts from live camera. Currently \$20 is such a deal for this, I'd honestly sell it for \$50 considering the predicament ewhores are in.

also everyone, working on a new update today

SIM-3475829 - June 18, 2018, 12:28 pm

not hating however

1. this is amazing but if u have 5 accounts and the fact that u need to buy them over and over is not in favour as you know snap bans alot of accounts if u get reported and shit which is out of your hand.

2. cant people do it with snap++ for free?

According to the OP you can't get banned with this method. Also, you tend to get banned a lot with snap++.

@Splunk can you send me a vouch copy of the app to review? I will give an honest review and I am always lurking the e-whore section where I can spread the word if this actually works.

yup, I'll hook you up. you'll be the only one though. I've also updated the app today to v1.0.1 and it has a logout feature (for people who've authed multiple accounts)

Arkane21 - June 18, 2018, 3:11 pm

I have to say I did not expect this, but this app is better than snap++ and all that other bs. It will not ban your account because the app redirects you to the actual snapchat app when you select a photo or video. It works really smoothly and it's extremely simple to use.

Very quick and professional support too.

Vouch for this app and splunk. GLWS, the customers won't be disappointed.

tyou can use 4-5 accounts, but you have to pay for an auth for each account (that's just the way it works, I'm firm on this). However, if you're doing 4-5 accounts I could probably discount you heavily.

and actually the way I distribute this, I set you up and let you try it before I charge you (for ANYONE trusted or untrusted). the reason is, I can de-auth people at ANY time anyways so it's stupid if someone tries to scam. so I go first to everyone and let them try it out.

I've had 7 people who purchased this though already.

Work perfectly, even if you need to pay 28\$ for account I think the price it's fair enough... I don't think snapchat can ban you for use this, it's easy to use and fast.

I'm really new in this snapchat ewhoring so I never use the modded app that some of you already

use in the past, but this one work perfectly and I don't see any motive to get banned using this.
About @Splunk this guy is really friendly and help me a lot. ?

I really want to do a "big" review about the product, but I just feel like it's simple... This app work perfectly.
already use it for 1 entery day, never stop working, never lag or anything, not sure how he do it but this app is just perfect.

If you have doubts about it, just buy it, you are going to make the money back in no time ? . (well you still need to find people and SE and all ... but you don't go have problems sending live pics or videos).

I just can say guys.... Buy this and start working my boys! there it's not excuse for don't make money with this... ? ? ? ? ?

BTW... apologize for my english.

yup yup. i fixed some limiting issues on my end, and now realize I can give up 64 slots. I've sold 30/64 slots. Then I'm closing this thread. :) So if anyone is thinking about it, they should do it now. Probably will be gone in days.

It lets you select photos or videos VIA CAMERA ROLL ; then translating them into snapchat as if you JUST took the video or picture.

does that make sense? unless you meant something else entirely.

EDIT: I've purchased this tool, and it has already paid itself off. I wanna thank Spunk for making such a smooth looking and easy to use tool. This honestly should cost so much more, it's the perfect answer to Snap++ being down. Buy now to get an easier, forever lasting SNAP+

My only suggestion would be to add a 18:9 resizer so pics can be re-done to Snap Size :)

If you want a legit way to directly send live pics & vids I highly suggest you snag this while you still can.

I use this myself as well as several others in the adult community and it's the best way to post live media. Also the chance of getting banned is nearly non-existent as it's not a modded app.

Golddigger. - July 9, 2018, 3:54 pm

I bought this today. The service was the best I've ever had. Quick responses and clear instructions. The idea of this is good. However, after installation my iPhone 8+ was tripping. Apps were automatically opening and closing. My phone got very hot and was lagging. I decided to delete the app and my phone instantly changed to its normal temprature and the lag stopped. I dont know if it's just my phone or the app itself. I'd rather not use this app myself again.

The deal went smooth, so I hope the seller will refund my purchase. I will update this post when possible.

PS. I defenitly think ewhorers should check this app out and give it a try!

Just bought 2 copies and tested the app. It's amazing if you're into e-whoring, and the best thing is
that you don't get banned from it like when you use modded versions of SC like Snapchat++. It's
also good if you just wanna show off fake photos on your main acc lol, everyone will think you just
took the pic because it doesn't say "uploaded from Camera Roll" Just make sure you resize your
pics if they don't fit :)

The whole setup process is easy to do, and OP is very kind to deal with. Tbh I think it should cost
way more but hey I'm not complaining

I highly recommend everyone to buy this RNNN

this is a good idea, but it just wouldn't work since I have to register UDIDs in iTunes account and you can only remove UDIDs at the end of the subscription year. So like, when someones trial ends I would have to remove their UDID to make room for someone else and Apple doesn't let me do that. A solution to bypass the UDID limit would be to get an Enterprise-level developer account, but I'm pretty sure you need a real business for that.

nahh for some of my users this doesn't happen (i'm not sure what triggers it). but this is something that just unfortunately comes with the way I made this app. Regardless, when sending as DMs (or direct photo/video to friends) it never says it.

it beats the memories method by a long shot because it doesn't say "from memories" and you can send to friends personally and crushes the sticker method because it can do videos. I'll try to research a fix though

Just an update. I purchased this on the 9th and let me tell u its one of the best things I have ever seen. Its so simple and yet SOO effective. If any of you are hesitating to buy well DONT. Its literally the best investment you could make. I rarely ever write reviews but I had to do it on this one. Get it before its tooooo late! I LOVE SWEET

I WILL BE BUYING THE ANDROID ONE TOO <3

1. make sure Snapchat is updated
2. make sure Sweet + Snapchat are BOTH logged in on same account (MUST be the account you
paid to be authenticated)
3. if still not working, delete and reinstall (using same instructions i sent before)

You should definitely consider porting over to Android if possible. You could give people the .IPA and tell them to use Cydia Impactor which is a PC app that can install .IPA's. Otherwise, looks sweet haha.

Great seller to deal with, and an amazing app.

Does exactly what it says it does and for the price you literally can't go wrong, you will make it back within minutes.

Works absolutely perfect, the only downside for me was that I had to update my snapchat (I hate the new update), but other than that it's honestly the best investment for snap e-whoring.

Good shit Splunk, thank you bro.

EDIT! FIGURED IT OUT! This isn't good. I'm going to have to move a little smarter now, but the app still works. App working after reinstalling, thanks for taking care of it ?

Driz - July 26, 2018, 4:03 am

Hi man, I know its not my place to say, your item, your sales etc. But you might wanna change build numbers/edit builds after passing access to say, 10 people. So when these get revoked/taken down, there's not a massive outage but a small minority who get limited functionality. It'll serve two purposes, fixing and deployment will be much smaller, and Snapchat will not catch on to the exploit that much sooner

Sold out.

There are two users I believe who haven't got their order filled (you guys will be taken care of right now).

Other than that, no new buyers. I told everyone I had limited space. It wasn't the original 32 I predicted, but I can only register a max of 100 UDIDs in my iTunes dev portal, and I sold 100 copies.

Sorry for the inconvenience. Old buyers will always get my support, and I'll still continue to work with those users that have been having issues. As for everyone who purchased, thank you!
