Earnings Proof: Spoiler [\(Click to View\)](#)

Stop following the same old process of failure. Start earning from CPA and unlock unlimited earning potential. My name is Steven and in my first 2 months of CPA I made \$5000 whilst doing my exams and having an active social life. Earning money doesn't need to consume your life. I'll show you how making money with CPA can be easy with minimal investment of your time and money. This e-book offers an easy to understand but detailed guide of CPA niches, how to discover the most lucrative niches at any given time and ideas on how to promote each individual niche in order to maximise your earnings. Earning \$5k in 2 months is not a guarantee, how it is a guarantee that this ebook provides valuable information for those wishing to do CPA.

Don't wait around. Start banking now.

Before presenting my thoughts I would like to say that prior to reading this eBook I have no experience with CPA at all.

LAYOUT:10/10

The overall layout of the eBook was very well put together. It was very easy to understand all of the topics that he speaks about and he explains them all in detail one by one to make sure you can understand them.

Grammar: 9/10

There are little to no errors throughout the entire eBook. The sentence structure flows well through the entirety of the eBook.

Difficulty: 3/10

Most anyone can start doing this as long as they have a brain. It will take some time to set up but once set up, I can see it going on autopilot almost.

Overall: 9/10

The ebook is put together very well and has helped an unexperienced CPA user like myself feel as if I can now start and easily start to make some money from this. This is definitely worth \$7.50 to anyone that is wanting to get into the CPA world!

Actually not fake at all. If you are into CPA then this is for you. It literally has a list of niches that are in right now and can be used. Also explains what to do with them and how to get setup.

This method is VERY detailed. In the 20 pages you will find in-depth knowledge about what CPA is and how to find a niche.

It then goes on to providing a huge amount of CPA networks. I would recommend buying.

I posted my earnings proof on the first post. Also I've had a few reviews now. Just wait for the Appraisers review if you're worried about the quality of my vouches/reviews and see what they think of it. :)

This isn't one specific method btw, it's a detailed e-book that shows a variety of niches and ways to promote them. I don't cover one method, nor do I personally only use one method to get my own earnings. The idea of this e-book is to be unsaturable, diverse so it will cover something that plays to the skills of every buyer and also something that shows you not just how to find the best niches/ways to promote now but how to find the most successful niches at any given time.

I ain't hitting anyone with 1 method bs as usually those methods have already been run dry by the

writer, copied or just weak which is why they sell it in the first place. Which is why my guide is all-in-one CPA niche e-book.

Plus I provide my Skype in the e-book and will answer questions from any buyers and help them set-up their CPA campaigns in my spare time. This all for \$7.50 is a pretty good deal. This is my first e-book on this site so I wanted it to be extremely affordable whilst having a lot of content.

Not vouching or anything since I have not bought the ebook but its only 7.50\$, and out of the reviews I have seen it looks good so far.

This could potentially help beginners getting started or increasing earnings for people who are already running stuff IMO.

anyway, good luck with sales man!

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your eBook.

Product: [\[5000\\$ in 2 Months\] CPA Niche Destruction](#) by "[Ivex](#)"

This eBook explains what CPA is, how it works and shows you what niches to work and how to work them. The eBook is 20 pages long.

Before I get into the method itself, I'll give some feedback on the eBook design, grammar and anything else that's worth mentioning.

First off, the salesthead. It definitely looks good, it's accurate and to the point. The price of the eBook itself surprised me, considering you are advertising everyone can make thousands a month. After reading the eBook I understood it more as it's not a one way trip to being rich and people have got to put in effort to make it work.

This eBook is well written, I found a minimal amount of errors and easy to read through. Personally I haven't done a lot with CPA but I was able to follow and understand it without issue. The design of the eBook is clean, the illustrative screenshots assist the method well and it's overall very easy to read. My only suggestion would be to change the table of content as it's was a bit confusing at first, due to the sections within the page nummers in the TOC.

Now to get into the method itself. "CPA Niche Destruction" is an eBook that explains in detail what CPA is, how it works and how to use it yourself. It talks about Niches in detail and offers you a ton of suggested niches where you could profit from. I think it's worth mentioning that the included list of 300 niches is very helpful as well if you're in need of some inspiration for ideas. As I previously mentioned the method isn't a step by step guide on how to get rich, which is something I like about it very much as this leaves the reader a lot of room for personal ideas and action. The method overall is comprehensive and whilst it's not unique, it is definitely beneficial if you want to get into CPA and you need help to do so.

The method is pretty straight forward. You have to sign up to a CPA website, make your own landing page and work a niche of your choice. Aside from that you'll of course need to advertise it in order to get leads. The eBook explains to you how to do this and gives you some helpful tips on how to maximize exposure. I like the fact that the eBook itself gives you exactly what you paid for and doesn't falsely make claims of guaranteed earnings. You will definitely be able to earn from this, though you'll have to put in the work. As said in the eBook as well as the sales thread, it doesn't need to consume your time in order to earn, however I would say that in order to earn thousands from this you'll either need to invest money into the right advertising or put in a lot of work yourself.

Aside from the method itself I do want to quickly address that I really liked the list of 300 potential

niches you put into the eBook. It offered niches I hadn't heard of before, which will definitely benefit the reader. Like with all CPA methods, it does require some work and creativity, but even in that department you offer the reader more than enough help.

This eBook is priced at \$7.50 which is a fair price for the eBook in my opinion. Not much else I can say about that other than good job.

Final Thoughts

Overall I think this is a well written eBook, worth the price and certainly has potential when it comes to profiting from it.

A suggestion I do have is to change up the lay out of the eBook itself a bit. It's well written but it does have that generic HF eBook feel to it due to the golden dollar sign images as well as the chapter headers and the very basic table of contents and cover page. Maybe change some images to high resolution ones and make the format look a bit more professional. All in all this isn't a big problem though, as the information is there and that's ultimately what matters.

Another suggestion would be to fix your website, CPA.gg as it seems your hosting suspended you. Should be an easy fix assuming you backed up your files :)

If I would have to summarize this review in a few sentences I would say that this eBook is straightforward and provides you with the knowledge and tools to start your own CPA projects and earn money from them. This is what a method is supposed to do in my opinion. I've said this before other reviews, but I'm going to say it again considering it also applies to this eBook. If you are looking for something to make you some extra cash a month without too much work a day, buying this eBook will be worth it. If you are looking to make a lot of money a month online, you could also use this method but like I've said a few times now, you gotta put in the work. Free money doesn't exist ;)

thelastzoldic - August 13, 2018, 11:33 am

Hello, I have some questions:

- 1) Does it require having any traffic source (website, blog, social media.. etc)?
- 2) Does it involve e-whoring or any blackhat methods?
- 3) Do i need any investment to start?

2. No.
3. Depends on how you approach it. I started with no investment, made money and then re-invested.

I have gone and above and beyond to offer you support, as seen by the screenshots. My support has been given despite the fact you underpaid, you paid \$6 for a \$7.50 eBook and my support has been given post-payment so the 'no response since payment' part is unequivocally untrue.

My support has stretched to contacting the owner of a major CPA network in order to help you after I told you I'd give you extra support with CPA if you'd sign up to the network I use using my ref link, which you said you did and you didn't.

Out of good faith, despite this and the fact you underpaid I have been giving you support. I have not responded yet today as I am busy, I have other jobs to do and a life to live and I cannot always offer instantaneous replies.

Please, do not expect further support if you plan on trying to sales trash.

This information still works as we approach the end of 2019.

I'm considering creating an updated version which I'll offer to existing customers for free if there is a
demand for it.

Of course, CPA has changed somewhat in the last year and I don't make as much as I used to. But
the information provided can still set you on your journey and is particularly good for CPA newbies
looking to make their first couple of grand from CPA.

I'm taking it very serious, I'm kind of bad when it comes to getting into new things so
