Thread: [\[Help\] "XXX not working" error on Assembly.Load](#)

Crakxproo - June 18, 2018, 4:47 pm

```
Code Assembly.Load((byte[])ResourceManager("Test",  
Assembly.GetExecutingAssembly()).GetObject("TestObject"));
```

When i compile a stub, it returns a error box showing "XXX not working" and "reporting to microsoft" error

Or could someone give me template code

<https://imgur.com/a/inj8VJY>

is the error

Woes - June 18, 2018, 4:51 pm

I thought this thread was just a bad joke about XXXTentacion's death.

Whos that?

What 'bout him?

0xDEAD10CC - June 18, 2018, 5:10 pm

So your code throws an exception, you don't post the exception, and you want people to spoonfeed you a solution with no context?

LMAO so did i holy shit.

Vyxn - June 18, 2018, 5:56 pm

Please debug it again and post the error here. We don't have magic ball here. :(

Electron - June 19, 2018, 5:22 am

Check if the passed argument (byte array) is right. I mean if you are really obtaining the bytes.

Crakxproo - June 19, 2018, 5:45 am

don't know why but that new object[1] fixes TargetParameterCountException i'd get
Don't these two statements contradict what I was asking for?...

The parameter count is determined by the array length and needs to match the invocation.. Sounds like this project is over your head.

Jaguars - June 20, 2018, 11:01 am

Debug your program and recheck the parameters

Electron - June 21, 2018, 6:54 am

Why did you make 2 threads about it? Check my answer here:
