Thread: [Windows 10 - Filter Keys automatically turning on after reboot](#)

Uzmer - June 19, 2018, 8:19 am

Why tf its turning automatically on after reboot?

I tried manually disabling it on control panel but still no luck.

did the same thing in registry.

i have windows 10 cracked.

Help

Erhan - June 24, 2018, 9:57 pm

I hope this helps.

1. Open the Control Panel and change the view to Large icons, and then click Ease of Access Center.
2. Scroll down to the Explore all settings section, then click Make the keyboard easier to use.
3. In the window that shows up, uncheck the box for "Turn on Filter Keys" to turn off the Filter Keys features.
4. Click the Set up Filter Keys link. In the Filter Keys setup screen, uncheck the option for "Turn on Filter Keys when right SHIFT is pressed for 8 seconds".
5. Click OK to save your changes.
