Thread: [\[Teacher|Student Training Course:\]> _Learn Website Hacking & Make \\$\\$ _\[/n00b Friendly\]](#)

mObile - June 19, 2018, 3:35 pm

Disclaimer:

Hacking is illegal. I take no responsibility what you do with this information. For educational purposes only.

Welcome to BlackHat Administrators "Teacher/Student Course" in Website Hacking. We are a 4 year old private Web Exploitation Group.

Specializing in:

- Website/Server Hacking & Security
- Other

[\[Introducing:\]> _BlackHat Administrators _\[/Application Challenge\]](#)

This course is for the entry level hacker wishing to learn more about the art of website h4(k5. From setting up a VPN/Proxy to finding and exploiting website vulnerabilities to shelling servers using several step by step newb friendly methods.

No Experience required. Will train.

What is a shell?

A web shell is a script that can be uploaded to a web server to enable remote administration of the machine. Infected web servers can be either Internet-facing or internal to the network, where the web shell is used to pivot further to internal hosts.

Once successfully uploaded, an adversary can use the web shell to leverage other exploitation techniques to escalate privileges and to issue commands remotely. These commands are directly linked to the privilege and functionality available to the web server and may include the ability to add, delete, and execute files as well as the ability to run shell commands, further executables, or scripts.

Shell Access Gives You:

Spoiler [\(Click to View\)](#)

- Full Control over Database
- Permissions to directory/folders/Links/Ads
- View files
- Edit files
- Download files
- Delete files
- Upload files
- Execute MySql queries / commands
- Bypass mod_security
- Execute shell commands

- Harvest and exfiltrate sensitive data and credentials.

FREE Hosting:

- Send Malware to Clients as Vendor or Upload additional malware, for example, by creating a watering hole for infection and the scanning of further victims.
- Use as a relay point to issue commands to hosts inside the network without direct internet access.
- Use as command-and-control infrastructure, potentially in the form of a bot in a botnet or in support of compromises to additional external networks (e.g. if adversary intends to maintain long-term persistence)
- Host Malicious .php Scripts
- Use Mailers & Spoofers to spam
- Create Fake Websites/Phishing
- Unlimited Bandwidth
- Unlimited Space

Profit from Shell:

- ad.fly Method:

Manually inject your iframe into links/pages on each site, replacing links/banners/directory's ..ect with your ad.fly link to redirect users and earn money.

- RAT Spreading Method:

Infect users that visit the websites.

- XMR Mining Method:

Mine XMR through high traffic shells.

- Bitcoin Mining Method:

Mine Bitcoin from websites.

- BlackHatSEO Back-linking:

Link 'your' websites from compromised ones and redirect their traffic to your site. More traffic=More sales=More profit.

You will get:

- > Access to over 30+ 50 step by step tutorials & methods
- > 1 on 1 support
- > Potential profit

Access to a compilation of basic website hacking tutorials & methods that meet HF requirements.

Preview:

Spoiler [\(Click to View\)](#)

Potential Profit:

Spoiler [\(Click to View\)](#)

Once you've learned how to shell servers and want to lean more towards the BH side of things you'll will be given the opportunity to become a seller on a web shell shop. Or be a WH and check for bug bounties.

...or sell them here in the HF marketplace at your desired price, or do nothing. The choice is yours.

?

Instead of creating an e-book about it, we came up with this. As it's more hands on then trying to learn from a book.

Cost of 2-3 month course:

\$100 (BTC/ETH/BCH) only.

Takes a little time but nothing is easier to shell sites then these methods without going into more advance stuff that would just confuse you.

I will guarantee 100% that you will learn to hack random websites or your money back!

This is not for everyone but if you're interested, please fill out and post or PM the form below:

Quote:I have read the disclaimer: Y/N

Name/UID:

Age:

Payment: BTC/ETH

Students Enrolled: 25

Disputes/Complaints: 0

Student Vouchers:

Spoiler ([Click to View](#))

No vouched /copies available but a quote from a student that's want's to remain nameless.

Quote:OMFG! I can't believe how simple it is. Thought it took years to learn this kinda stuff.

What a rush, I'm having fun doing this, thanks!

Update: 6-24-18

A student of mine that started the program less then a week ago just started to make his money back by selling uploaded mailers from his shelled servers and sent me a screenshot from his dashboard. ?

Quote:Hey mObile, just wanted to say thanks. I have already made my money back and learned something new thanks to you. <3

Reputable Vouchers:

Cytax - June 28, 2018, 9:56 pm

How long are these tutorials available for after purchase? What language are the shells typically written in? Is it enough 1 on 1 time to be able to ask questions frequently?

mObile - June 29, 2018, 2:48 pm

(Jun 28, 2018 09:56 PM)Cytax Wrote: [\[CITE\]](#) How long are these tutorials available for after purchase? What language are the shells typically written in? Is it enough 1 on 1 time to be able to ask questions frequently?

I have over 50 easy step by step tutorials and methods posted because not everyone has the time to learn on a day to day basis so the program will last a month if not longer. Plenty of time to master these tuts & methods.

The shells are written in php, which I'll supply and explain how to use them for profitable reasons.

Even though each step is posted, every student has 1 on 1 support, so it's fine to ask questions frequently. ?

Elitas - June 30, 2018, 8:44 am

Super cheap. MObile is one guy I can 100% vouch for.

I know he will teach you all you need to know in order to earn a lot of money as a cyber security researcher online.

Thank you and sorry for bad english. i am not native.

I think OSCP gives enough knowledge you just need to use Google dorks effectively and go shelling.

seal - August 6, 2018, 8:46 pm

bro i am really interested in this let me know if you will accept me ?

mObile - August 24, 2018, 2:50 pm

(Aug 2, 2018 07:20 PM)raigorstonehoff Wrote: [\[CITE\]](#) Hello, i am interesting..

(Aug 6, 2018 08:46 PM)olowogbogboro Wrote: [\[CITE\]](#) bro i am really interested in this let me know if you will accept me ?

Both have been accepted and have started the course. ?

There is currently 1 spot left before the price is raised to \$150 per student, so if you're interested lmk asap and I'll go over the details. ?

Melanor - August 25, 2018, 4:13 pm

Hello I had a question when you say noob friendly do you mean already knowing how to code or a complete noob? Thank you

mObile - August 27, 2018, 1:34 pm

(Aug 25, 2018 04:13 PM)Melanor Wrote: [\[CITE\]](#) Hello I had a question when you say noob friendly do you mean already knowing how to code or a complete noob? Thank you

This course is for the complete noob. It does not require ANY coding knowledge. ?

James Burnham - August 28, 2018, 3:41 pm

Mobile is a hard-working guy. I am sure he has a lot of things to teach to his students. If you check his sales threads you won't see him selling any of these overpromising/underdelivering ebooks that are whitehat and easy at the same time. Instead, you will see he is offering services closely related to the student program he is offering here. That is a good indication that the program is of good quality. Big vouch.

Mail Merge - August 29, 2018, 12:51 am

I am ready for software cracking mentorship.

Do you provide any such mentorship?

UrbanWarfare - August 29, 2018, 12:25 pm

How many hours per day are required to be able to effectively learn your techniques? Would I require a separate computer to work from? Is there any minimum system requirements? Are proxies required? Thanks

mObile - August 29, 2018, 5:08 pm

(Aug 28, 2018 03:41 PM)? Mr. Burnham ? Wrote: [\[CITE\]](#) Mobile is a hard-working guy. I am sure he

You know me and you know I'm legit so thanks for your kind vouch on my thread.

Right now I currently have 12 satisfied students and not one complaint. ?

(Aug 29, 2018 12:51 AM)Mail Merge Wrote: [\[CITE\]](#) I am ready for software cracking mentorship. Do you provide any such mentorship?

Sorry this is a website hacking course and has nothing to do with software cracking.

(Aug 29, 2018 12:25 PM)Nobrainier Wrote: [\[CITE\]](#) How many hours per day are required to be able to effectively learn your techniques? Would I require a separate computer to work from? Is there any minimum system requirements? Are proxies required? Thanks

How many hours per day are required to be able to effectively learn your techniques?

Tutorials/Methods are already posted so as many hours as you want I guess, there is no time limit. Most people work and don't have the time to sit on the pc 24/7. Learn on your time. ?

Would I require a separate computer to work from?

No. Your home PC will work fine.

Is there any minimum system requirements?

Nope. Any PC and internet access.

Are proxies required?

Just need a VPN. The program offers you a free premium VPN if you don't already have one. ?

If you or anyone else is interested in joining and learning together with my other students ...now is your chance. ?

UrbanWarfare - August 30, 2018, 12:39 am

Thanks for the fast reply. I am still in limbo....

mObile - August 30, 2018, 2:46 pm

(Aug 30, 2018 12:39 AM)Nobrainier Wrote: [\[CITE\]](#) Thanks for the fast reply. I am still in limbo....

Just remember what I said in the OP. ?

I will guarantee 100% that you will learn to hack random websites or your money back!

Armada - August 30, 2018, 11:06 pm

Still waiting for my vouch copy bro ? looooo

Seriously though, mObiles shown me a few of these things previously. For the price, this is a bargain.

UrbanWarfare - August 31, 2018, 12:41 am

Just not to sure what I would actually do with the info. I am always looking for ways to monetize. I assume the best way to monetize would be white hat methods. However I like the idea of BH methods such as using the email database or adding my own links to steal the link juice. Do you provide tips on how to best implement the info gained from your course?

TheLazyAdmin - August 31, 2018, 9:06 am

Hi, i'm a noobie and interested in program. Can you PM with price info. Thx

UrbanWarfare - September 1, 2018, 3:19 am

Can you pm me. I have some ideas I would like to run past you in regards to shelling particular sites

Whiteee - September 1, 2018, 8:14 pm

Does this include an undetectable shell?

Vyxn - September 1, 2018, 11:54 pm

This is a nice investment. The guy knows what he's doing.
Vouch vouch vouch!

GNUUNG - September 2, 2018, 3:14 am

posting to revisit later, looks prime =)

jonnyA - September 5, 2018, 3:21 pm

seems pretty interesting and the vouchs

mObile - September 6, 2018, 4:40 pm

(Aug 31, 2018 12:41 AM)UrbanWarfare Wrote: [\[CITE\]](#) Just not to sure what I would actually do with the info. I am always looking for ways to monetize. Disclaimer:

Hacking is illegal. I take no responsibility what you do with this information. For educational purposes only.

Welcome to BlackHat Administrators "Teacher/Student Program" in Website Hacking. We are a 3 year old private Web Exploitation Group.

Specializing in:

- Website/Server Hacking & Security
- Other

[\[Introducing:\]>_BlackHat Administrators_\[/Application Challenge\]](#)

This program is for the entry level hacker wishing to learn more about the art of website h4(k5. From setting up a VPN/Proxy to shelling severs using several step by step newbie friendly methods. No Experience required. Will train.

What is a shell?

A web shell is a script that can be uploaded to a web server to enable remote administration of the machine. Infected web servers can be either Internet-facing or internal to the network, where the

web shell is used to pivot further to internal hosts.

Once successfully uploaded, an adversary can use the web shell to leverage other exploitation techniques to escalate privileges and to issue commands remotely. These commands are directly linked to the privilege and functionality available to the web server and may include the ability to add, delete, and execute files as well as the ability to run shell commands, further executables, or scripts.

Shell Access Gives You:

Spoiler ([Click to View](#))

- Full Control over Database
- Permissions to directory/folders/Links/Ads
- View files
- Edit files
- Download files
- Delete files
- Upload files
- Execute MySql queries / commands
- Bypass mod_security
- Execute shell commands
- Harvest and exfiltrate sensitive data and credentials.

FREE Hosting:

- Send Malware to Clients as Vendor or Upload additional malware, for example, by creating a watering hole for infection and the scanning of further victims.
- Use as a relay point to issue commands to hosts inside the network without direct internet access.
- Use as command-and-control infrastructure, potentially in the form of a bot in a botnet or in support of compromises to additional external networks (e.g. if adversary intends to maintain long-term persistence)
- Host Malicious .php Scripts
- Use Mailers & Spoofers to spam
- Create Fake Websites/Phishing
- Unlimited Bandwidth
- Unlimited Space

Profit from Shell:

- ad.fly Method:

Manually inject your iframe into links/pages on each site, replacing links/banners/directory's ..ect with your ad.fly link to redirect users and earn money.

- RAT Spreading Method:

Infect users that visit the websites.

- XMR Mining Method:

Mine XMR through high traffic shells.

- Bitcoin Mining Method:

Mine Bitcoin from websites.

- BlackHatSEO Back-linking:

Link 'your' websites from compromised ones and redirect their traffic to your site. More traffic=More sales=More profit.

You will get:

- > Access to over 30+ step by step tutorials & methods
- > 1 on 1 support
- > Potential profit

A compilation of basic website hacking tutorials & methods that meet HF requirements.

Potential Profit:

Spoiler [\(Click to View\)](#)

Once you've learned how to shell servers and want to lean more towards the BH side of things you'll will be given the opportunity to become a seller on a web shell shop. Or be a WH and check for bug bounties.

...or sell them here in the HF marketplace at your desired price, or do nothing. The choice is yours.
?

Instead of creating an e-book about it, we came up with this. As it's more hands on then trying to learn from a book.

Cost of course:

\$100 (BTC/ETH/BCH) only.

Takes a little time but nothing is easier to shell sites then these methods without going into more advance stuff that would just confuse you.

I will guarantee 100% that you will learn to hack random websites or your money back!

This is not for everyone but if you're interested, please fill out and post or PM the form below:

Student Vouchers:

Spoiler [\(Click to View\)](#)

No vouched /copies available but a quote from a student that's want's to remain nameless.

Update: 6-24-18

A student of mine that started the program less then a week ago just started to make his money back by selling uploaded mailers from his shelled servers and sent me a screenshot from his dashboard. ?

Reputable Vouchers:

Spoiler [\(Click to View\)](#)

i really want this Student Training are you still talking student if yes, am 100% willing and ready to learn .

If i learn Shell with your program i will be able to spread my RAT via Website ????? I have Zero experience with Shell

mObile - October 12, 2018, 5:34 pm

(Oct 12, 2018 04:36 PM)rosie Wrote: [\[CITE\]](#) If i learn Shell with your program i will be able to spread my RAT via Website ????? I have Zero experience with Shell

Yes. You can add your stub several ways.

Hide it behind links/buttons.

Redirect users using iframes.

Just to name a few.

Also made a step by step tutorial that's part of the course. ?

[\[HACKED WEBSITES:\]>_RAT Spreading Method_\[/TUTORIAL\]](#)

rosie - October 12, 2018, 6:06 pm

ok I will be back to you very soon ...Thank's

rosie - October 13, 2018, 7:50 pm

Heyyyy man ..i had some free time and take a look at your thread ...i mean a lot of those why don't i read your work .before.....it's gon a be soon . if someone like to have some private training after buy and use this course i belive it will be possible ????

chefrcook - October 13, 2018, 10:03 pm

Hello I have some questions

please pm me

EL BB - October 14, 2018, 4:44 am

Interested.

Are the tutorials in docs or videos? Are they downloadable?

Do we get lifetime access to these docs, for future use/reference?

NohTow - October 14, 2018, 5:24 am

posting here to come back later

Captain Pre - October 14, 2018, 6:23 am

Can you PM me with more details?

very new to this and this looks something interesting

mObile - October 14, 2018, 1:58 pm

Sent you my discord.

Hollar@me and I'll answer any questions you may have about the course. ?

(Dec 18, 2018 03:46 AM)Ksalazar43 Wrote: [\[CITE\]](#) I only have paypal will you accept?

Sorry bro no PayPal, just Bitcoin.

For obvious reasons, I'd suggest you invest in bitcoin if you are planing on buying anything hack related.

Get a BTC wallet and try to exchange your paypal for bitcoin in the Currency Exchange section found here;

[Currency Exchange](#)

if you're worried about being scammed then I'd use a middleman.

Imk how that works out and get back to me. ?

mObile - December 23, 2018, 10:45 am

Just added my 26th student today with no complaints, and that makes me feel good knowing the course is worth the money. ?

Hit me up if you're interested.

I'll go over the details and answer any questions about the course you may have.

Happy Holidays HF! ?

mObile - December 27, 2018, 12:43 pm

Don't forget that we are now accepting 2 students for the price of 1.
So you and another HF member can now enroll together at the original price.
1 student = \$100
2 students = \$100 (Must enroll at the same time)

mObile - January 19, 2019, 3:29 pm

We are still accepting 2 students for the price of 1.
So you and another HF member can now enroll together at the original price.
1 student = \$100
2 students = \$100 (Must enroll at the same time)

Jsinc - January 20, 2019, 8:52 pm

do you accept paypal? .

clift - January 24, 2019, 8:37 pm

I want to be trained. If someone wants to be second, then inform.

davidsk2001 - January 25, 2019, 1:20 am

Hi,
Do you include some 'methods' to make money when hacking? The course will teach to hack a random website but if we face some website that can't hack, do you provide a guide for student to hack?

clift - January 28, 2019, 9:59 pm

(Jan 24, 2019 09:37 PM)clift Wrote: [\[CITE\]](#) I want to be trained. If someone wants to be second, then inform.
To my regret, there is no second person who wants to learn.
mObile I am ready to undergo training and pay \$ 100. Please inform the contact and wallet for payment. ?

I will sign up with you as your second person :D :D

mObile - January 29, 2019, 1:05 pm

(Jan 20, 2019 09:52 PM)jsinc Wrote: [\[CITE\]](#) do you accept paypal? .
I only accept Bitcoin, sorry bro.
I'd also suggest you'd invest in some btc if you plan on buying anything hack related as most sellers only accept crypto currencies as payment.

You can try to exchange PayPal to Bitcoin in the Currency Exchange section.
<https://hackforums.net/forumdisplay.php?fid=182>

PM me or reply if and when your set up and I'll send you my contact information and go over the details. ?

(Jan 25, 2019 02:20 AM)davidsk2001 Wrote: [\[CITE\]](#) Hi,

Do you include some 'methods' to make money when hacking? The course will teach to hack a random website but if we face some website that can't hack, do you provide a guide for student to hack?

Yes. Once you start saving your shells you'll be given the opportunity to sell them on several web-shell shops. Or keep them for personal use. Your choice. ?

All sites are random. If the site can not be compromised, there is no guide to hack it without vulnerabilities.

(Jan 28, 2019 10:59 PM)clift Wrote: [\[CITE\]](#) To my regret, there is no second person who wants to learn.

mObile I am ready to undergo training and pay \$ 100. Please inform the contact and wallet for payment. ?

Have questions?

Post or PM and tell me about it. ?

itsdes - September 17, 2019, 2:50 pm

Hello, I am very interested though I cannot PM due to having a new account.

Essentially what I am interested in doing is learning how to embed my stream into an account basically to gain viewers over time, "i,e" adding it into a banner at 1 pixel and 1 volume so no one would never know its there. Im assuming this tutorial would help me out with that.

If you could email me: joker96396 at gmail thanks :)

focuss - September 30, 2019, 7:07 am

Sounds promising!

Have sent you a pm.

smelltheglove - September 30, 2019, 7:42 pm

Wbs9652 - November 13, 2019, 12:32 am

How do you conduct this course? I've taken courses before, took the ZDResearch Web Hacking Course in 2018 and I actually had to go to where it was being held and attend each course. The entire thing was pretty expensive but I learned alot. I like taking these courses because I'm working on writing my own guide on a related subject. Lets say I do pay you 100 in BTC; what next? I see other students have enrolled according to your post, are we ALL taking the course all at once? What does the course consist of? I really am intrested in taking a hacking course from a black hat approach since the 2 big ones I've taken and the multiple books i've read are all from a white hat perspective. Give me a break down on the course and what it contains in it and I will buy it for the sake of reviewing. I will say this, I've bought plenty of "black hat hacking books" targeted at web hacking and it was pretty much a combination of scraping the internet for a couple of hours using SQLi google dorks until you found one that could be injecteable and trying to break into the admin panel to upload a php shell or using a combination of public or maaaaaaaybe 0day exploits you

happen to stumble upon a webapp upload function to spoof the file format and get the site shell'd. Not trying to be too critical here but if I do take the course I will be planning on reviewing it just like I did to BlackRose's "SQLi HandBook" (now I know why it costs 5\$) I'd be cool if you switched it up and talked about maybe RFI or LFI exploits and stayed away from using 1day exploits from cxsecurity and exploithub for webapps.

anyhow, please get back to me I really am intrested in this course. It seems more promising then anything I've seen on this forum in years. Not trying to come off as a total asshat (sorry if I already did) but I really dont want to get ripped off for 100\$ to have someone teach me how to dork google for admin panels and run burp intruder and upload a php file. give me the 411 on the actual meat of the course. don't worry about the money making aspect; I mail for a living so I'm eating plenty ?

mObile - November 14, 2019, 7:28 am

Shells are also good for blackhatSEO
blackhatSEO operators use shells for site control rights and to tamper with the pages of a controlled website to achieve site promotion.

wireshark016 - January 6, 2020, 6:05 am

hey mate, it's been awhile since I've logged in due to having to focus on 2 certifications I recently received. That said, HF is blocking me from recovering my old name with all my points/level.

I am all for signing up. I do know the basics, but everything i know has been taught to me white hat / conceptually. no real examples. I think I'd be a very quick learner. I also have a private home server so im pretty familair with all the hosting concepts. You can count me in.

jeez, i've become pretty paranoid with chat servers, like skype even pidgin. If emails are ok, spinaltap1@protonmail. com works of I can get on another vm. Looking forward to it! ;)

Agro Garden - January 6, 2020, 10:08 am

Yup, this is exactly what I am looking for. Can I join the class?

mObile - January 8, 2020, 1:35 pm

(Jan 6, 2020 07:05 AM)wireshark016 Wrote: [\[CITE\]](#) hey mate, it's been awhile since I've logged in due to having to focus on 2 certifications I recently received. That said, HF is blocking me from recovering my old name with all my points/level.

I am all for signing up. I do know the basics, but everything i know has been taught to me white hat / conceptually. no real examples. I think I'd be a very quick learner. I also have a private home server so im pretty familair with all the hosting concepts. You can count me in.

jeez, i've become pretty paranoid with chat servers, like skype even pidgin. If emails are ok, spinaltap1@protonmail. com works of I can get on another vm. Looking forward to it! ;)

Welcome to Hack Forums.

Sent you all a PM with my contact information.

hollar@me ?

Reedf27 - January 9, 2020, 4:51 am

How many hours would you reccomend pr week? Will you still offer support if it takes more then 2-3 months ?

Think I am going to order this soon.

mObile - January 9, 2020, 3:08 pm

(Jan 9, 2020 05:51 AM)Reedf27 Wrote: [\[CITE\]](#) How many hours would you reccomend pr week? Will you still offer support if it takes more then 2-3 months ?

Think I am going to order this soon.

The course is over 2-4 months long because not everybody has the time to sit on their PC everyday, so there is no rush. Learn on your time. ?

You will get:

> Access to over 30+ 50 step by step tutorials & methods

- > 1 on 1 support
- > Potential profit

Takes a little time but nothing is easier to shell sites then these methods without going into more advance stuff that would just confuse you.

I will guarantee 100% that you will learn to hack random websites or your money back!

Shyne - January 17, 2020, 3:20 pm

hi how can i contact you?

mObile - January 19, 2020, 11:55 am

Disclaimer:

Hacking is illegal. I take no responsibility what you do with this information. For educational purposes only.

Welcome to BlackHat Administrators "Teacher/Student Course" in Website Hacking. We are a 4 year old private Web Exploitation Group.

Specializing in:

- Website/Server Hacking & Security
- Other

[\[Introducing:\]> BlackHat Administrators _\[/Application Challenge\]](#)

This course is for the entry level hacker wishing to learn more about the art of website h4(k5. From setting up a VPN/Proxy to finding and exploiting website vulnerabilities to shelling servers using several step by step newb friendly methods. No Experience required. Will train.

What is a shell?

A web shell is a script that can be uploaded to a web server to enable remote administration of the machine. Infected web servers can be either Internet-facing or internal to the network, where the web shell is used to pivot further to internal hosts.

Once successfully uploaded, an adversary can use the web shell to leverage other exploitation techniques to escalate privileges and to issue commands remotely. These commands are directly linked to the privilege and functionality available to the web server and may include the ability to add, delete, and execute files as well as the ability to run shell commands, further executables, or scripts.

Shell Access Gives You:

Spoiler [\(Click to View\)](#)

- Full Control over Database
- Permissions to directory/folders/Links/Ads
- View files
- Edit files
- Download files
- Delete files
- Upload files
- Execute MySQL queries / commands
- Bypass mod_security
- Execute shell commands
- Harvest and exfiltrate sensitive data and credentials.

FREE Hosting:

- Send Malware to Clients as Vendor or Upload additional malware, for example, by creating a watering hole for infection and the scanning of further victims.
- Use as a relay point to issue commands to hosts inside the network without direct internet access.
- Use as command-and-control infrastructure, potentially in the form of a bot in a botnet or in support of compromises to additional external networks (e.g. if adversary intends to maintain long-term

persistence)

- Host Malicious .php Scripts
- Use Mailers & Spoofers to spam
- Create Fake Websites/Phishing
- Unlimited Bandwidth
- Unlimited Space

Profit from Shell:

- ad.fly Method:

Manually inject your iframe into links/pages on each site, replacing links/banners/directory's ..ect with your ad.fly link to redirect users and earn money.

- RAT Spreading Method:

Infect users that visit the websites.

- XMR Mining Method:

Mine XMR through high traffic shells.

- Bitcoin Mining Method:

Mine Bitcoin from websites.

- BlackHatSEO Back-linking:

Link 'your' websites from compromised ones and redirect their traffic to your site. More traffic=More sales=More profit.

You will get:

- > Access to over 30+ 50 step by step tutorials & methods
- > 1 on 1 support
- > Potential profit

Access to a compilation of basic website hacking tutorials & methods that meet HF requirements.

Preview:

Spoiler ([Click to View](#))

Potential Profit:

Spoiler ([Click to View](#))

Once you've learned how to shell servers and want to lean more towards the BH side of things you'll will be given the opportunity to become a seller on a web shell shop. Or be a WH and check for bug bounties.

...or sell them here in the HF marketplace at your desired price, or do nothing. The choice is yours.
?

Instead of creating an e-book about it, we came up with this. As it's more hands on then trying to learn from a book.

Cost of 2-3 month course:

\$100 (BTC/ETH/BCH) only.

Takes a little time but nothing is easier to shell sites then these methods without going into more advance stuff that would just confuse you.

I will guarantee 100% that you will learn to hack random websites or your money back!

This is not for everyone but if you're interested, please fill out and post or PM the form below:

Students Enrolled: 25
Disputes/Complaints: 0

Student Vouchers:

Spoiler [\(Click to View\)](#)

No vouched /copies available but a quote from a student that's want's to remain nameless.

Update: 6-24-18

A student of mine that started the program less then a week ago just started to make his money back by selling uploaded mailers from his shelled servers and sent me a screenshot from his dashboard. ?

Reputable Vouchers:

Hi, please pm me, i wanna know more!

supercza - April 12, 2020, 6:07 am

Hi. I would like to take the course. Please pm me.

basseb - May 8, 2020, 6:22 am

I will take the course when I have some spare time

LordDragon - July 9, 2020, 1:56 am

I am interested in learning this, is it still available? also does anyone has op contact?

Baruh50 - September 19, 2020, 3:36 pm

Hello. Do I want to take a course (if it's still available)?

Please, write to me PM.

slurpjuice - September 28, 2020, 1:40 pm

PM me, have BTC funds ready.

bombilaritos - October 5, 2020, 3:08 pm

i need some help can you please help me? send me a pm i have something interesting

nasteyy - October 26, 2020, 8:09 pm

Hi Mobile, please pm your contact i am interested in the course.

Hacker_dz - November 28, 2020, 8:36 am

please give me the link, Thanks

zaeik - January 20, 2021, 12:43 pm

i have sent you a Pm. please check that. thank you!

campusminger - January 30, 2021, 5:09 am

if this is still available lmk

thank you

osmanaksit - April 7, 2021, 2:03 pm

program is exactly what I was looking for. I can't PM you. I want to meet in detail. Can you PM me? or let me contact you with your contact information.

dechorro - December 25, 2021, 10:14 am

still available?! please send me a message!

JohnnyBrown111 - August 15, 2022, 7:59 pm

What type of websites would I be able to hack after this course?

Could you give some examples of the possible to hack websites?

afdsf - September 2, 2022, 12:14 pm

Shoot me a pm, im interested in this course
