(Jun 21, 2018 07:57 AM)Washi Wrote: [\[CITE\]](#) Ok mister over-confident-coder. What is the point of your thread then? The only thing I am seeing here is a piece of source code ready to be copy pasta'd by the lurkers here. Not sure if that was your intention or not. Furthermore, if someone would've understood the concept behind this, they'd be able to code one themselves anyway.

This section is not pastebin, this section is a coding forum were we discuss code or teach others by the means of tutorials. With this attitude you won't get far here...

Also, what's up with these?

PHP Code

<?php

[DebuggerHidden] [EditorBrowsable(EditorBrowsableState.Never)]

You know those attributes are only used in IDEs, and have absolutely no effect in other debuggers or other reverse engineering applications right?

Not to mention all the "==" true"s I see in your if statement conditions :/

1. With the attributes, I know they're ignored mostly, this code was for skids

2. the "==" trues"s were for all the people (skids) that can't understand code

3. Since I'm a good programmer, i'll post source codes In C# and Nim, and A few tutorials to resurgence' (spongebob tone) the skids

Xamarin - June 21, 2018, 8:27 am

Ok good contribution for skids .. but as others have mentioned ... you should provide additional information, so that someone should know if he shall give some time to read and use the code (for example you could say that you have added a very simple VM detection).

Also about the code as people before me said, the attributes do not have any reason of existence. Additionally, in statements like this:

```
Code if (Convert.ToBoolean(Mutex.OpenExisting("PERL")) == true || VM() == true ||
Debugger.IsAttached == true)
{
    Environment.Exit(0);
}
else
{
    ....
}
```

you can use a reverse if to reduce "clatter" in your code and make it more readable/beautiful.

It's mean't for skids..?

It's only mean't for copy and paste so someone can ripoff a customer as a joke with a cheap USG

To bad, so Sadd.

plus don't act like i should'net do this, plus most coders keep secrets, soon ill make botnet sources watch me..

You completely missed the point lol.

Ok man. You do you. A happy ending for everyone.

From what it looks like, you seem to be really toxic, and every other reply is pure aids.

This for example:

Quote:1. With the attributes, I know they're ignored mostly, this code was for skids

2. the "==" trues""s were for all the people (skids) that can't understand code

3. Since I'm a good programmer, i'll post source codes In C# and Nim, and A few tutorials to resurgence' (spongebob tone) the skids

You called yourself a good programmer, but doing `if(bool == true)` is the exact opposite of being a good programmer, then you said it's for the "skids", if so why not simply release a builder for it anyway, but to contradict that, you then said Quote:if someone doesn't understand it , they Don't Deserve it..

so why even use `if(bool == true)`, and you're grammar is terrible / what you write is hard / painful to read.

You just seem like a bit of a twat

Crakxproo - June 21, 2018, 11:05 am

Either way don't say that because it shouldn't matter to you. Plus, I'm working on a C crypter thats Near FUD, and it shouldn't be your job to project your opinion as a fact, which can either be true or false .

I'm also working on a botnet to prove myself worthy.. Peace you Hypocrite

On Other, Competing forums, i have accounts which are built up and have good rep..

Soon, there will be tons of mini-botnets around once I wake up the skids

Then prove it instead of posting trash over and over again.

(Jun 21, 2018 10:03 AM)Crakxproo Wrote: [\[CITE\]](#) why do that to my rep?
He didn't, you did.

(Jun 21, 2018 11:05 AM)Crakxproo Wrote: [\[CITE\]](#) Peace you Hypocrite
I don't think you know what a hypocrite is.

Nick (Name) - June 21, 2018, 4:20 pm

Can't tell you how many times I've reported your threads/post, I honestly want you gone you're no help copying and pasting from old threads or from StackOverflow and then calling yourself an "good programmer". You're annoying and low quality, you spam copy and paste shit in this section that other members have done before, I really don't want your trash in this section, and hope your threads and posts get purged when you get exiled.
