I received a vouch copy and the bot performs great. You do need a 2captcha key which is easy and cheap to get for the account creator. The chat/spam bot, follow bot both properly function flawlessly. You do need proxies, but 1,000 proxies are already loaded for you out of the box, so that's very convenient. I highly recommend this program if you want to troll or have fun. Also, pretty useful if you want to become a Twitch affiliate/partner as the follow bot can help you meet the minimum requirements, so that is a plus. Overall, 9/10 product. Very solid at what it does and easy to use!

I got a vouch copy for chatbotted, and I can say it works. Makes accounts pretty efficiently and the chatbot works for sure! I also really liked the Miscellaneous tab that gives you information about a twitch account and its channel. My one main criticism would be the quality of the account usernames, they're certainly spam accounts with random generated names (MUTY5Z8Z etc). I also would sometimes get random popup error messages, and the program would keep shitting out more error popup messages, but I'm sure that could be tackled by a future update. I didn't get to test it too vigorously because it was exams week but I think it updated 2 or 3 times during my 1 week period, which is promising. Was a pleasure testing it and I wish I had more time to use it :) especially with all the kinks sorted. Thumbsup

I bought 3 programs on here for Twitch Account Creating and the Chat bot tool. All I have to say is this is the BEST program on the forums and also their support team is AMAZING couldn't say anything bad about this team and their work.

Quote:INFINITY Wrote:

Massive vouch for Viewbotted, Skyline & Ghost Rider.

The program works exceptionally well, and their support is great.

I've used the program to give followers to friends and members of HF, and it worked flawlessly creating the accounts and sending them to the channels I wanted it to.

I haven't tested the viewbot portion yet but if it's like any other downloadable bot, it will work as long as you have proxies and the Viewbotted team tells you where you can get proxies from to get decent viewer numbers.

The program has had consistent updates and the developers seem to be open to suggestions which is a very good sign for the program.

I highly recommend purchasing if you're in the market for a twitch bot.

Yep. :) No need to buy web viewbot services like views.run who charge \$5 for 10 hours. We only ask \$25 and it's yours for a whole month. :)

New update soon.

Will make the app more user friendly and simple to use.

plowking090 - July 14, 2018, 1:36 pm

i purchased this and it works great. im running into a issue where after a decent sized follow command all or most of my accounts are banned after that. Ive read and heard of a process where i can reauth the accounts with a bot of some sort. Does anyone here have one or know of where to find one? Ive searched but am having issues locating one.

But this service is fantastic, wish i made twitch prime accounts. Would be even better!
