Thread: [Contracts MyCode and System use REQUIRED](#)

Omniscient - June 22, 2018, 9:24 am

You are required to use the Contracts MyCode and the Contracts system in the CE section. Anyone refusing to use Contracts system for a CE should immediately be reported to me. They will get banned.

<https://hackforums.net/showthread.php?tid=5851151>

Any existing thread without it will be closed. Any new thread created without it will be junked. Anyone refusing to use Contracts for a CE will be banned.

Contracts system is there to protect members from scammers by keeping a precise log of all exchanges and if they are completed or not. By requiring Contracts MyCode you'll be able to see if a member has opened multiple currency exchanges and has not completed them, which could be a sign of a scammer.

So I'm guessing this means members can report threads as policy violation without contracts mycode in the OP?

Please do not. We're working on a plugin to auto-detect the MyCode and prevent posting without it.

Omni you typed "Contacts" in the title instead of "Contracts".

It's good change.

Will it be consider policy violation like we deal over PM (if both party agree)

Or

Just to refuse contract deal ?

Hi Omni, I'm glad this change is pushed through. Can you please give my exchange thread 1 edit so I can add the contract button? Unfortunately, I reached the edit limits. :(

The reason I ask this is because my thread has a lot of vouches that people can see when they consider dealing with me. Thanks in advance.

If I completed my limit of edits on a thread with some feedback, I will need to create a new one with a contract right?

If someone reports you, you will get closed. If I find evidence you're doing CE without Contracts, you will get closed.

Actually, you're closed for even thinking it. That's how serious this is.

EVERYONE WILL EVENTUALLY USE THE CONTRACTS SYSTEM OR SUFFER THE CONSEQUENCES!

If your old thread is not closed then please close it and start a new thread under the new policy.

Please note I'm still in the process of designing a better CSS button for the MyCode.

Thanks for the update, I already applied the button to all my threads ?
