Thread: [RDP/VPS Backdoor Access Exploit](#)

mework - June 22, 2018, 10:06 am

When you crack some rdp or get any rdp no metter how theres always chance someone delete your account and you lost access to that rdp..

well when you install my exploit on any rdp and any os you will have backdoor access.. It means if owner or anyone else deletes your account
you can use backdoor access and create new account or backup your data.

advantages:

- Unoticable (Means its so good hidden then owner or admin cant rly see it)
- Script dosent contain virus, its basic script and never wont be detectable..
- It dosent run in background, only runs when u want to run it.

PRICE: 50\$

PM ME FOR CONTACT!

Lextian - June 23, 2018, 11:19 pm

I wanna learn more about this, add me on skype am interested.

mework - July 9, 2018, 11:17 am

pm your skype... bro.....

pmed

CocaColax - October 6, 2018, 5:57 pm

Hi pme your skype so we can talk

ArmDegree - October 6, 2018, 5:58 pm

I just use a backconnect RAT for this. This is a better method?
