Big vouch for Meow and this tool, it's lightning fast and works without any issues. Meow gave me the tool to test it out before releasing and I am very pleased with it.

Definitely worth to purchase it!

Yes, there is an option where you'll be able to see if user has enabled 2FA on his account. I added that feature just to make it easier, so you (and others) don't have to login to the account just to see it being protected with 2FA.

Thanks.

I'm interested but have some questions before I gather the money.

- Are there any external programs or tools needed? (like a VM, Android phone, etc..)
- Will this work if the victim is in another country (like how Instagram does the location verification, does snap do the same)
- Refund policy?
- Is this working for Windows 10

- No need for any external programs. I've cracked accounts that are from US (and some other countries) and it worked, I am in EU btw. I see no reason why would you need a refund. It's working for Windows, obviously.

another guy dm'd me asking if this tool works. i cant dm back so i will post my review here

tool works without issues or problems, i am running windows 7 os with 8 gb of ram (if that helps). i personally just purchase my own proxies since its a lot faster that way.

i had some problems importing 2captcha key as i didnt know how to get one. meow helped me instantly within minutes over email. vouch.

i was also told there is going to be new version released so im looking forward to that addition.

Vouch for this tool. Meow offered a vouch copy of this tool in a server and I got it.

Using my own proxies this tool was lightning fast, I tested it on 3-4 new accounts just to make sure everything is working and it is.

For \$20 this is a steal in my opinion, especially for this kind of tool that is not seen on the market every day

Thanks for the vouch copy Meow, appreciate it! @ everyone else, don't hesitate to cop this.

Riyu - June 25, 2018, 8:48 am

After playing around with the tool for the past few days (and getting 2.0 version this morning), it's safe to say I can leave a review.

First of all, I was very impressive on how this tool works and how fast it is. I purchased some other crackers before and they were nowhere near as this one. I'm sure who is the coder of it but this one is definitely not some public shit.

As for features and everything, I like it and it's worth \$20 imo. It's super simple to use and Meow included additional guide/ebook with a brief tutorial and most common FAQ that answered my problem.

I tested the tool on one of my old snapchat accounts and it was able to crack it. Again, i'm very happy with what I received and Meow has my personal vouch!

Hello Guys,

I'm fairly new to all of this but I just have a quick question regarding this program as I am highly interested.

My question is, I am free to hack any account I want to? Let's say I wanna hack my friends account for shits and giggles is that possible?

From what I can conclude from the video, is that you just cracked a random guys account or?

Would like some clarification.

Thanks!

Meow - August 5, 2018, 7:06 am

(Aug 5, 2018 06:42 AM)Juzt Wrote: [\[CITE\]](#) Is there a 100% chance to get a account?
Depending on the account, if the password is too complex then it might take longer or tool is unable to crack the password.

If the password is something simple (a word, word with numbers, etc) then there is good chance it'll crack the password.

Thanks.

Juzt - August 5, 2018, 7:37 am

So theres a pw list included right?
Is this a world wide pw list or usa?

Password list is included (around 1 million wordlist - I can include a few more if you'd like). It's worldwide in english language so I guess it falls under US + more category.

Thanks.

Also are some included :P
How many proxies you use heavily depends on how many accounts you entered & how many
threads you put, the more the better I guess.

The tool has a built-in proxy scraper so you don't have to worry about that. You can also use your
own proxies if you'd like.

WARNING:

Author claims: "Only a one time fee -- No additional payments necessary" "NO HIDDEN FEES"

THIS IS NOT TRUE!!

You will need a 2captcha account and buy tokens for atleast 10\$, this will last for about 1000 login attempts (you have 1,000,000 passwords to try)

. The script is just brute forcing, using a username with a password.

The proxy service that comes with the script is useless. 1/10 works, not for long, You will need to purchase your own proxies.

other than this, it works as it should :)

Hey Meow,

I want to buy your product but I have somme questions for you

1) I will need a 2captcha account and buy tokens?

2) Are you going to provide the proxy services or I have to purchase my own proxies?

3) Just to know if it works, can I send you an Snapchat account and can you crack with your app (if it's possible)

2. Yes, you can use your own proxies if you'd like. There is a built-in proxy scraper in the tool which you can use to get proxies. Thanks.

Meow - August 30, 2018, 8:05 am

I've replied to all inquiries regarding this tool, thanks a lot everyone.

I can see that a lot of questions are repeating so I'll answer them here so everyone can see

- This tool DOES come with proxy scraper. You're more than welcome to use your own proxies tho.
- This tool WILL WORK on Windows 7/8/10, haven't tested it on Windows Vista and XP. Sorry.
- I DO provide support with this, obviously. Slide me a message or email me and I'll get back to you asap

Thanks! ?

The proxies received using the scraper is horrible.

It takes 20 minutes or so while retrying with a new one before it finds a working one, which then checks for a couple (yes, a couple) of passwords .. and then goes to try another working proxy.

In an hour I only get through 12 passwords or less.

I followed the guide. It's very simple. However, I thought the proxies would actually work.

I've tried 1 thread, 2 threads, 5 threads and up to around 15. Same result.

I feel like asking for a refund, but ... is there something I can do before going that far?

As stated in the [OP](#), proxy scraper scraps free (and often public) proxies. It's always recommended to purchase private proxies.

Members ask me all the time which proxies I recommend, my answer is always Vip72 (<http://www.vip72.com/>)

I'm in no way affiliated with them, they're not sponsoring me or anything like that, their service is just awesome.

I got 20-30 proxies from them and they work much better than the free ones, but I still have a problem. When it says "Bad proxy at line X - retrying with a new one" it keeps retrying with the same proxy it seems. Is it supposed to do that?

With these new proxies from vip72, I can now get to 20 passwords per hour or something. Much better than before, but still far from enough to crack a password. I suspect it keeps trying the same proxy despite it says retrying with a new one?

This is an exact scenario:

It says "bad proxy at line 17 - retrying with a new one" for maybe 100 times. Then it finds an invalid password, and goes on with the same error "bad proxy at line 17" over and over again.

At 2captha, I currently have a count of more than 1.000 captcha's done but I estimate a total of 40 passwords has been found so far. It rarely says invalid captcha. Only seen it a handful of times.

First of all, I was very impressive on how this tool works and how fast it is. I purchased some other crackers before and they were nowhere near as this one. I'm sure who is the coder of it but this one is definitely not some public shit.

As for features and everything, I like it and it's worth \$20 imo. It's super simple to use and Meow included additional guide/ebook with a brief tutorial and most common FAQ that answered my problem.

I tested the tool on one of my old snapchat accounts and it was able to crack it. Again, i'm very happy with what I received and Meow has my personal vouch!

It has been brought to my attention that some users are experiencing tool crashing randomly. I have personally tested it on 5 virtual machines in hope to replicate the issue and fix it, however tool was working fine for me (Windows 10 / average specs).

We'll definitely push a new update in the upcoming weeks, once we fully see what triggers tool to crash.

I have a query about these tools that you are guessing

Does the tool depend on the password list? Or on the proxy

If the tool supports only existing passwords in the list, the passwords are already registered

How can someone collect all the passwords of people around the world?

Proxy scraper scraps proxies from multiple free websites on the internet. If you'd like to get premium/fast/private proxies, feel free to purchase those.

Additionally, check the bonus .PDF folder that came with the tool for more information & quickstart guide.

But in thread u said i dont need any addition costs to use it.

So ive to buy proxy list or get a free one by myself, and have to play for 2captcha....

Cant use it now without paying any extra.

Can i get a refund? Cant need that tool now..

Can somebody explain to me how this works? Does this hack the password for snapchat or allow you to access the person's snapchat?

How can you view a video sent by the user you're trying to hack? Can you view old messages ?

Again I'm not sure if this tool is just for the password or for the password and access to the account. It's been a while since I've used Snapchat (years) and I'm not sure if things have changed since I used it last.

Thank you

PM'd you. Proxy scraper crashing, even using my own proxies its failing it keeps giving me errors in the log. Maybe a refund is just the best route, I think the tool may just be outdated.

deademotionz - August 1, 2019, 9:18 pm

This tool is fake. it uses a proxy list and is very slow and you will never actually crack an account with this. It works just enough for owner not to be called a scam, but really it is a scam!

Useless describes this tool the best, proxy scraper doesn't work, meaning you have to buy proxies on top of buying credits on recaptcha which is not stated, after buying both these and putting them where they should be the tool still does not work, messaging the tool creator during this about 10-15

messages in the space of 3 days maybe, (he takes a long time to reply no matter how quick you are to reply) and telling him the errors he tells me basically "getting those errors means it's working" useless.

Hey man just got the tool and i love how simple it is, i do need some help with setting a proxie or at least getting one. Please let me know if you can help.

update: i downloaded a free proxy scraper and now i dont know what way i should export the proxies. whenever i try to use the proxy scraper in app it crashes so i am using proxyscraper. please pm when youre available

Thank you !

Austrie2 - September 20, 2019, 10:47 pm

Tool does not work well.

Claiming there are no other costs is a flat out lie - be advised you must pay for 2Captcha, albeit

cheap, \$10 minimum. You'll also need to buy premium (paid for) proxies since the provided scraper does not actually work.

Even with premium paid for proxies (which are almost mandatory since the "proxy scraper provided" does NOT work) you will still receive "error bad proxy" messages over and over and over. So you change the proxies, and guess what, same errors on the same line of proxies.

I reached out to meow by email and it was ignored so I decided I would post here.

Please don't waste your money.

Also I'll include a video tutorial as some members had issues with making the tool work (there is still a .PDF file included that explains in-depth how to get started).

Proxy checker says the proxies are all dead, probably because in order to use them IP needs to be whitelisted. But again, depends on the website you purchase it from.

more then not you got ripped. as no reason you should need recaptcha as seems he used the basic accounts.snapchat.com/accounts/login since you need 2cap. as if he used a private url it would not only make captcha services not needed but would also bypass a susp login attempt you gonna hit. sad seems he didnt put more work into the tool. as you not gonna see anyone saying they got a account legit hacked via his tool in this thread sadly. and to see if it really worked then go make a login on snapchat and try load into tool and see if it even hits that as ill assume its not gonna.

this tool is not working and have tried for days on end and have gotten no where

as said I have double checked and downloaded the the files and tool on two separate PC's

My IP is dynamic and hasn't changed.

My proxies are whitelisted and active.

My 2Captcha funds are going down and confirmed to be solving captchas by support team

TOOL IS NOT WORKING as of 10/10/19 - please reply to my emails or discord with a video of

Have proxies sorted, ready to roll but i don't know where to get reliable 2captcha, what do you suggest?

I've purchased proxies from stormproxies and captcha from 2captcha - is it normal for the log to consistently be saying "invalid captcha" it seems it hasn't got a single one right yet..

In this video I was using free proxies. It took around 15-20 seconds to crack account using free proxies from proxy scraper. With fast/private proxies you can crack accounts in seconds.

This application seems great but I have yet to get it to work. It keeps telling me my proxies are bad. Now after taking the advice of the instructions with the application and investing in a premium proxy service, I am still having the same issue. Does anyone have a solution to this?

hamzahogu@gmail.comI'm going to explain this nicely so you can understand HF rules and not get banned, alright?

You see what all of these people have next to their post, "contracted customer" tag.
<https://prnt.sc/qlzui3>

Meaning we have on-site proof they purchased something from me.

Your post doesn't, so even if you wanted to open a DD on me or think I'm "fugging with you", I'm not. You're not even able to open DD on me since you don't have A CONTRACT.

You'll get banned for not using contracts.

Now the question is, how can you open a contract?

You click on [THIS BUTTON](#) in the 1st post on the thread. Then you'll be prompted to start a contract, agree and start one.

Now you will have a "contracted customer" tag, and then you'll get a PM from me with the download link of the tool.

Want to learn more about contracts?

Hello, is your software still for sale? Does it still work with the new snapchat updates?

I'm interested in this but have some concerns. I watched the demo video and your password.txt is 1kb which means it only has 1 password in it. Even with only 1 password in your list it still took a good 20 seconds or so to login.

So my question is, realistically how fast is this thing? Is this going to be able to handle a txt with 1,000,000 passwords in a few hours or is it 1 password every 20 seconds?

Thanks
