Thread: [Resell rights - netflix cracker - autobuy site - licensing system](#)

jordan0159 - June 22, 2018, 1:15 pm

Hey,

As the title says I'm selling full source and resell rights for a netflix checker along with the autobuy site and automatic licensing.

Cracking requires no proxies, no captcha and is blazing fast (only really bottlenecked by your network requests bandwidth).

Cracker is coded in golang - and as such no additional obfuscation or protection would be required to prevent the majority of skid crackers from leaking the software (reverse engineering golang binaries requires knowing asm for the respective cpu). Additional protection such as tamper protection, hwid etc can be added on request for a small extra on the purchase price.

Site automatically sets up licensing and app download upon a successful and confirmed crypto payment.

This cracker would be perfect for setting up your own profitable netflix store or better yet selling with the licensing to other users!

pm me for more information/my contact details.

Custom software and crackers can also be made rapidly upon request.
