Thread: [Common Activity/Threads in common](#)

?????IGI??? - June 22, 2018, 3:37 pm

Hello all... I'd like to make a suggestion to have a feature that allows you to view threads you and a selected user have posted in.

That is all.

EDIT to help understand:

Something that allows you to see threads that both you and a user have participated in.

For example, Infamy posted in this thread and so have I. So I can now use this feature to see what threads we have posted in in common and this thread "Common Activity/Threads in common" would be one of them on the list.

Like your posts on their threads, and their posts on your threads?

I don't follow

You want a feature that compares two user's threads?.. Why can you not just open two tabs.

Okay to make it more clear... Something that allows you to see threads that both you and a user have participated in.

For example, Infamy posted in this thread and so have I. So I can now use this feature to see what threads we have posted in in common and this would be one of them on the list.

I can't think of one single time I would have used this in the past. We all have different needs, I guess this is one of yours.
