Thread: [AnguisCaptor/DragonHunter LiteCode and SecureSocketProtocol](#)

gigajew - June 23, 2018, 2:44 pm

Since AnguisCaptor/DragonHunter is seemingly gone, I took the liberty of cloning his repositories for archiving purposes. He will be missed. All these OG users are disappearing, maybe some are focusing more on real lives or just moving on from the community. Understandable, at least they left a legacy.

SecureSocketProtocol: <https://github.com/gigajew/SecureSocketProtocol>

LiteCode: <https://github.com/gigajew/LiteCode>

Thanks, I cloned his repositories after he deleted his GitHub account, not sure how you did it but I did it manually over a few archiving sites. Thanks for supplying this on your account, it's quite an amazing project for those who work with sockets.

Sho?kwave - June 26, 2018, 2:30 pm

DragonHunter is still around, he moved from GitHub to GitLab after the whole Microsoft ordeal

Yeah 855 days ago, he's been gone from HF for quite some time now.

so this might be an old ass bump but I found this on another website.

he didn't leave he was kicked out. sucks. but that's the way she goes.
