Thread: [Audible books to mp3 or something ?](#)

packofmidgets - June 24, 2018, 12:38 pm

Is it possible to convert audible books to mp3 to play on mp3 players? I know I can listen to them on my phone but my phone is kind of big but I have a mp3 player and was thinking maybe its possible to convert them somehow? Anyone able to do this if so let me know thanks.

First you must find audiobooks in iTunes or have song files recognized as audiobooks and then convert them all to MP3 format. Choose "Edit" > "Preferences" > "General" > "Import Settings". A new window will pop up, drop down the first menu and ensure "MP3 Encoder" and then set the encoding quality.

Are you able to download the audio book?
Also, is there any chance you can find the audio book on youtube?

Sure, download it to your phone and upload it to your computer via itunes, then follow the steps in the link I provided. If your iPhone can read the file type, I am sure that it is exportable.
