Thread: [Google Auth gone :\(](#)

Chrome - June 27, 2018, 6:19 pm

Hi all, It has been a long time since I have been on HF and since then for some reason my browser has logged me out, which has never happened before and I have a new phone and all of my gauth accounts are gone. Any chance someone can reset it for me please? After I have access to my account I will put everything in place to ensure this does not happen again.

Sorry for the inconvenience.

Dude why don't people save there backup code? Super important.

Why it says Remember to backup like 50 times.

Just be patient but there is a fee and I'm sure its worth it to you. Good luck.

Some forget to that at first, then after adding there's no option to backup other than delete.
