Thread: [Best Resources to Learn Python.](#)

micaiahx - June 28, 2018, 4:00 am

If you are a beginner programmer or want to start programming in python then you might in search of best free resources. According to my experience, youtube channels are best resources to learn python programming for free. Because they mostly created by people who love doing that not for money purpose. I figured out three resources but I not gonna give any rank to them, so without any further delay let's get started!

Corey Schafer:

This whole channel is based on only python. This channel have great python tutorials which are probably better than a udacity course. Also, in 2018 he had planned to launch tutorials on more advanced topics in python like "Deep learning", "Data science", "Django", "Flask" which will definitely boost you python skills. The link to this channel is:

https://www.youtube.com/channel/UCCezlgC97PvUuR4_gbFUs5g

The Net Ninja:

The net ninja is also another awesome channel. I will suggest this channel for beginners. This channel have python beginners tutorial and also this guy is currently uploading tutorials on "Django development" which feels freaking awesome! The link to this channel is:

<https://www.youtube.com/channel/UCW5YeuERMmlnqo4oq8vwUpq>

sentdex:

This channel is way ahead than previous ones. This channel have tutorials on python for beginners and intermediate too. It also provides contents on "Machine learning with python" and "Django development". He is currently uploading tutorials on "Artificial Intelligence" by python. For beginners they maybe a little bit hard but still this channel is great. The link to this channel is:

There are a lot of resources out there, non-profit and not-youtube. For example;

<https://automatetheboringstuff.com>. In my opinion one of the best resources to start off with Python (it's short but accurate). The fun thing is, you automate daily task while learning the language.

Did OP say, hey I am a super genius programmer here is some good ressources??

NO he did not, he shared some information which may help others because it may have helped him!

Stop your trash talk.
