Why are selling them on this price while you can make 2x that price mining monero, depending on the hash rate you show in OP?

I am mining on some of the servers just don't see a need to mine all of them so why not sell them.

I have more than 15 servers ready to be sold.

scanning is allowed.
not sure if spoofing is enabled or not but I'm sure it would be allowed if it is enabled.

THIS SERVICE IS NO LONGER AVAILABLE.
