Thread: [Vitani's eBook Review for "CPA Niche Destruction" by Ivex](#)

Vitani - June 29, 2018, 3:52 am

Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your eBook.

Product: [\[5000\\$ in 2 Months\] CPA Niche Destruction](#) by "[Ivex](#)"

This eBook explains what CPA is, how it works and shows you what niches to work and how to work them. The eBook is 20 pages long.

Before I get into the method itself, I'll give some feedback on the eBook design, grammar and anything else that's worth mentioning.

First off, the salethread. It definitely looks good, it's accurate and to the point. The price of the eBook itself surprised me, considering you are advertising everyone can make thousands a month. After reading the eBook I understood it more as it's not a one way trip to being rich and people have got to put in effort to make it work.

This eBook is well written, I found a minimal amount of errors and easy to read through. Personally I haven't done a lot with CPA but I was able to follow and understand it without issue. The design of the eBook is clean, the illustrative screenshots assist the method well and it's overall very easy to read. My only suggestion would be to change the table of content as it's was a bit confusing at first, due to the sections within the page nummers in the TOC.

Now to get into the method itself. "CPA Niche Destruction" is an eBook that explains in detail what CPA is, how it works and how to use it yourself. It talks about Niches in detail and offers you a ton of suggested niches where you could profit from. I think it's worth mentioning that the included list of 300 niches is very helpful as well if you're in need of some inspiration for ideas. As I previously mentioned the method isn't a step by step guide on how to get rich, which is something I like about it very much as this leaves the reader a lot of room for personal ideas and action. The method overall is comprehensive and whilst it's not unique, it is definitely beneficial if you want to get into CPA and you need help to do so.

The method is pretty straight forward. You have to sign up to a CPA website, make your own landing page and work a niche of your choice. Aside from that you'll of course need to advertise it in order to get leads. The eBook explains to you how to do this and gives you some helpful tips on how to maximize exposure. I like the fact that the eBook itself gives you exactly what you paid for and doesn't falsely make claims of guaranteed earnings. You will definitely be able to earn from this, though you'll have to put in the work. As said in the eBook as well as the sales thread, it doesn't need to consume your time in order to earn, however I would say that in order to earn thousands from this you'll either need to invest money into the right advertising or put in a lot of work yourself.

Aside from the method itself I do want to quickly address that I really liked the list of 300 potential niches you put into the eBook. It offered niches I hadn't heard of before, which will definitely benefit the reader. Like with all CPA methods, it does require some work and creativity, but even in that department you offer the reader more then enough help.

This eBook is priced at \$7.50 which is a fair price for the eBook in my opinion. Not much else I can say about that other than good job.

## Final Thoughts

Overall I think this is a well written eBook, worth the price and certainly has potential when it comes to profiting from it.

A suggestion I do have is to change up the lay out of the eBook itself a bit. It's well written but it does have that generic HF eBook feel to it due to the golden dollar sign images as well as the chapter headers and the very basic table of contents and cover page. Maybe change some images to high resolution ones and make the format look a bit more professional. All in all this isn't a big problem though, as the information is there and that's ultimately what matters.

Another suggestion would be to fix your website, [CPA.gg](http://CPA.gg) as it seems your hosting suspended you. Should be an easy fix assuming you backed up your files :)

If I would have to summarize this review in a few sentences I would say that this eBook is straightforward and provides you with the knowledge and tools to start your own CPA projects and earn money from them. This is what a method is supposed to do in my opinion. I've said this before other reviews, but I'm going to say it again considering it also applies to this eBook. If you are looking for something to make you some extra cash a month without too much work a day, buying this eBook will be worth it. If you are looking to make a lot of money a month online, you could also use this method but like I've said a few times now, you gotta put in the work. Free money doesn't exist ;)
