Thread: [Selling Yeezy Butter Cart/Auto Checkout Services \[\\$25\]](#)

Carbyne - June 29, 2018, 3:18 pm

We offer 2 different services both in UK and US regions. UK folks will only be provided our cart service, not autocheckout. Autocheckout requires you to give us your card info and we checkout for you. Carts are when we give you an Adidas.com account and you sign in and checkout with the Yeezy Butter in the cart (hence the service being called "carts".) Why would you choose autocheckout rather than carts? Well, when Adidas officially drops the Yeezys online, thousands of people will try to get these shoes which will glitch out the website causing you to "payment loop". This means that it will continuously keep looping you in the checkout section and is extremely frustrating. This is a problem people do not like to face, ergo auto checkouts. You will be given our Discord where you can message us and where we will message you when we get your cart. The autocheckout service will be done on Shopify websites which drop randomly, and we use the two best Shopify bots on the market: Dashe and CyberSole (which will basically secure you a pair, no extra stress needed.)

PM me if you are interested. It will be \$25 per shoe. Thank you.

Note: You don't have to give us your physical card information as we understand how it feels risky to do. So there is an alternative known as Privacy.com which is an online VCC provider and is really simple to use. You can open and close cards at will, up to 30ish cards a month. This is what most people do and it works just fine.
