Do you plan on getting these?

I bought the Blue Version when I was in 4th grade. I played it on my Original Gameboy. Now 20 years later I plan to play these.

They are a "reimagining" of the Gen 1 pokemon games. In 3 years my son will be as old as me when i played Blue and I would love to give him a 3DS with a VC version of Blue on it.

If only i had a Nintendo Switch.. its too expensive for my poor ass, otherwise i would get Lets Go Pikachu, i might as well start putting some money aside to save up for it

I wish you the best of luck friend. It may seem expensive but if you took \$100 out of 3 paychecks you would have enough. Or \$100 dollars every month and youd have enough to buy one before the games come out

I'll wait for the reviews to come in. Not a HUGE fan of Pokemon, but I did enjoy Fire Red and Pokemon Stadium which were the only ones I played. I'll probably just wait for the 2019 game to come out if the reviews aren't overwhelmingly positive.

I understand that. Mine is just for a nostalgia standpoint.

In 4th grade I bought Blue & Red, in 5th Grade I bought Yellow.

I can't wait for this to come out! I was so happy when they announced it as my first game was Fire Red and the amount of time I put into it was crazy. Played pretty much every main pokemon game after that so I am extremely excited to get it.

I'll be getting Let's Go Eevee for sure
