Thread: [\[FREE\] Cell phone hacking \(unless exploits are needed\)](#)

Intrusions - July 2, 2018, 11:16 am

Offering a free cellphone hacking service.

This is not a guaranteed service. It's hit and miss depending on the target. I will do as much as I can for you. If there are paid exploits, you are responsible for purchasing them.

Once again no guarantees!

Good day, i cant PM yet. I presume you have SS7 access. I would love free SS7 access, or a picture that gets programmed with a e-mail address and if you send the picture to someone the phone sends you the location. Is that perhaps possible. abcamateur20@gmail.com

Free... don't count yourself so lucky.

I provide a free service, doesn't mean I'll teach you how.

And yes your talking about merging a malicious exe with a jpeg and sending it to target... of course it's possible....

Ok. Thanks for the reply. Does your free service mean you will tell me what program would be able

to do it or what does it entail. I am new here. Scared to burn my fingers but willing to learn.
