I have currently got a Pixel 2 XL on my drop site which was bought from a user and he had made the transaction and bought from Amazon . So i just rebought from him and iam selling it for good rate.

Bid: 475\$ BTC

If here i found a good price i can sell to that person over Middlemen "Minimalist" or i ship myself lol and shipping on USA is free and international costs fee extra .

For proof the product i can login through team viewer and show it if you are genuine buyer.

Is this a product of the recent RMA label fraud method?

About 85% of the replacements they send/sent were retail, in my experience.

What do you mean "retail one"? Most if not all that they sent, especially near the end, were retail.

Anyways, lets not hijack this sales thread. GLWS OP.
