Thread: [WTB Wroking Facebook Like/Group Jacker plugin or script](#)

naki055 - July 3, 2018, 1:55 am

Hi guys I wanna buy Facebook like or Group jacker plugin/script .If anyone has any of these plugins or scripts please pm me

One guy came to me with a password protected zip file and asked for a payment before even seeing the actual script working :) And the ridiculous part is that he blamed me for asking a demo version of the script where it actually works

Yeah I know that there will be so many people to scam me.But I believe that nothing is impossible.The Like Jacker thing that I want was around until the mid 2017 but stopped working after the Facebook update. It is not about jacking accounts but more of a clickjacking.You can search for it on the web.Hope there will be someone to provide me with this script. ?

I have a script for pop up like boxes, like box code to use in a iframe tab (you can edit the tab to get clicks and likes) , the script for adding multiple like boxes in a tab.. but it doesn't simply does likejacking you need to drive traffic to the tab or website where the like box is and I have another script for that too and it costs a lot..

would you buy that and if you would buy then kindly mzm me with the price you can pay

thank you

You got a typo in your title, you spelled "wroking".

Thanks Leny for your reply. But I have already done that on my website. It doesn't bring as many likes as Likejacker did.
