I don't yet have enough posts to be able to PM.

I'm selling my web-based projects (online banking, courier service & account/giftcard/email checkers). If you are interested we can discuss and let you see everything & explain you everything about those 3 projects of mine. Unfortunately I don't yet have enough posts to do a discussion here so probably somewhere messaging platform you use?

online banking: [https:// raphaels-bank.com](https://raphaels-bank.com)

courier service: [https:// grayshippingline.com](https://grayshippingline.com)

for the checkers I mainly code them privately and its hosted through the users localhost using apache server as it's coded in PHP using cURL Library. I can still show it to you of course and let you test it.

ps: I had a warning level because I posted my discord somewhere which isnt allowed here

pps: any changes/updates you want to be done on the project will be done by me and I don't care about the copyrights.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
