Thread: [Hidden VNC - Hidden Remote Desktop Controller RAT - Works With All Windows Versions.](#)

micaiahx - July 3, 2018, 3:59 pm

Welcome to GrinGO HVNC Sales Thread

What is mean Hiddden VNC & Hidden Remote Desktop Controller:

Hidden Vnc allows you to remotely and sliently connect to a your childs desktop also control them desktop without they being seen.. You can control as hiddenly your kids desktop from EVERYWHERE! They NEVER see and CAN'T be watch your mouse, keyboard, browser (chrome, explorer, firefox etc.) or desktop actions.

Do not waste your time and money to cheap products I was bought and tested almost all popular botnets, rats, features and sources in DarkNET no-one working like our HiddenVNC product.

Features:

- Hidden Sliently Control Windows Desktops (All Windows Versions XP, 7, 8, 10 etc.)
- Hidden Recovery Passwords (Chrome, Firefox)
- Hidden Control Browsers (Chrome, Firefox, Explorer)
- Hidden Control Files and Directory (Documents, Folders etc.)

Contact send PM or Add Jabber:

Add my Jabber for discuss details.

Hidden VNC, Hidden RDP, - Work with all Windows versions (No need .NET Framework dependencies coded with C++) only 170KB stub size.

I never sell trash products! same H-VNC products price monthly (\$1.5K) \$1500 my price monthly \$350 also we product better than all h-VNC products.

No upfront payment! No Scam! Safe (Escrow) - Middleman Services - Accepted after I send your HVNC panel you can approved my payment with middleman service.

I can show yours panel and usage with live AnyDesk we can test with together proof is avaible dont worry.

Price:

We offer price only \$350 Monthly - exact same H-VNC products selling in markets for monthly \$1.500 you dont have to pay expensive prices for High Quality \$1500 [color=#ffffff also (Spamhaus Ignored private server plan included)]/color]

Setup:

You can get your private IP, Panel Address, Username and Password in few hours..

Rules:

No Refund, No Leak, No Crime.

Oh so you don't need an already existing botnet for this to work?

micaiahx - July 3, 2018, 4:35 pm

(Jul 3, 2018 04:23 PM)Chudd Wrote: [\[CITE\]](#) Oh so you don't need an already existing botnet for this to work?

Hi Chudd,

No need botnet but if you think keeping your bots in your botnet panel you can be use any botnet as you wish... it depends your purpose if you need more help about this just add my jabber we can discuss details..

Hello,

You dont have to trust me also TRUST NO ONE for your good peoples damn right this part because so many scam situations and deal disputes in here i know..... btw for this reason you never dont have to pay first let me go first when you got your HVNC panel, Stub and Documentation than you can make a payment for your license... also you can get middle man, escrow or guarantor and pay them as you wish sounds okay now?

DamienVC - July 4, 2018, 5:49 am

Can you stop using different font sizes/colors. A simple thread design would not be so irritating.

Also is this coded entirely from scratch? Does it use the open source VNC library? (which is under

the GNU GPL v3 license)

Since most hVNCs in C++ use caberp's hVNC class library, which uses that anyway.

UpTheCrust - July 4, 2018, 5:52 am

Why did you make a 3rd thread for this?

micaiahx - July 4, 2018, 8:25 am

Hello i just pay attention to people about my sales HVNC coded privately no does using Open Source Lib. etc..

If you want to test just add my jabber: micaiahx@jabb.im

Thanks a lot.
