Thread: [Update to "GPT Helper" multiple bots added.](#)

goners - July 4, 2018, 7:45 am

GPT Helper update

okay so first I want to say sorry to all the people that I've been using the app and I know about this update I'm going to make this for new people.

So let me explain to you guys exactly what GPT helper is.

It is an Android app that has multiple bots in it.

Here is a list of site's that are available now with bots

Bing - Microsoft search bot
Gifthulk video bot
InstaGC video bot
Inbox dollars search bot
Presearch search bot
Topsurfer ads exchange bot

These bots really do work and on almost any Android device.

It also works with BlueStacks or any Android emulator. "I designed it that way"

You can really earn \$\$\$ Bitcoin or Gift Cards.

In order to get this amazing app just Google "GPT Helper"

Ivex - July 4, 2018, 12:08 pm

How many installs do you have? Would you be interested in adding my GPT site and I'll pay you 25% referral commission? You'd just need to automate the video offers.

283 installs as of now doesn't seem to be a lot but for a me it's getting up there

What is the URL for your domain?

roltert - July 4, 2018, 2:30 pm

Any chances of getting banned?

There is always a chance of getting banned on the big named GPT site's just be smart with it and don't go watching all the videos in one sitting take your time and take breaks

UPDATE

Video bot for Earn.Ninja the site you own has been added
