Thread: [Glitchhack without cheats - float/airbug CSGO \(No cheats needed\)](#)

Silver Fang - July 4, 2018, 9:33 pm

Have you guys seen this?

Probably getting patched soon.

Quote: You enable console and type:

1. bind L "rcon"
2. Then find a community server Faceit Ip and Copy it.
3. Rcon_address (paste the faceit ip here)
4. Now hit space and hit L and you float.
5. Behind walls and cars (such as on dust 2) you can see over them and shoot thru walls w/o people seeing you.

Don't use if you don't want to receive a ban.

PolarisGang - July 5, 2018, 9:46 am

Quite useless tbh.

As mentioned in thread, ESEA requires you to be a spec to use the convar and Facelt manual bans + they'll probably patch it soon.

Only decent use is "risk-free" info gathering.

NegativeRep - July 5, 2018, 11:16 am

Won't take them long to write a 5 line for loop plugin to kick a client who runs the rcon command 1-5 time.

The command is sent to another server, not the server you are playing on.

Can this be done in official valve servers too?

Silver Fang - July 5, 2018, 7:35 pm

Yep.

Though again as it will probably be patched soon i would avoid it with main account.
