Kidding, Nice thread design. Definitely gonna check this out now!

Edit:

kinda disappointed no custom theme, even more disappointed its that overused theme lol but oh well.

If you're in need of a Custom Theme - <https://hackforums.net/showthread.php?tid=5847105> I make them, somewhat. I even have one pretty ready that could be modified and finished up as an anime theme if you're interested.

I also have a number of actually complete custom mybb themes I don't use if you're interested in any of that too.

Let me know.

Thanks for the feedback. One of the more minor things that will be changed. First priority was getting the forum up.
