log dot zip - July 5, 2018, 3:30 am

Previous thread (2 years ago) had 100+ vouches! I am back, taking a break from regular work and spending time with family.

Please [contact me here on Hack Forums](#) or on Jabber which is imruse@xmpp.is
I have been working in the industry on private projects for the latest years, that's why I've been taking a break here on HF.

Back ready to get working on some quick projects.

Taking BTC, LTC, and XMR as payment.
I'm doing all kinds of projects, pitch me your idea. I can do it.

For the last 1.7 years I worked at a cryptocurrency exchange as a backend developer. I do not take freelance jobs under 100\$, and I will never provide hacky/non-maintainable code.

Looking forward to doing business with you.

This user still has not completed my project and it's been About 2 months. He had a death in the family and I understood but not he won't respond and blocked me on discord. Will be opening up a dispute very soon unless he messages me what's going on or gives me a refund of \$400. I would not do any deals with this user until this resolved. Please message me Oxdead ASAP.

You should have used the contract system, so he could potentially get banned :/

He told me that need a week to complete my project. Basically today(after 3 days) I'm asking him how is going on.

After my message he locked me on discord.

He always tried to ask me more money but I said I can't pay more than that amount.

He asked me 70% upfront and 30% later. So pay really really attention!!!

He's gonna keep taking advantage of users and it seems like he's good at getting people not to use the contract system. Seems like his master's got him in deep debt, which is why he's scamming out smh. I'd love to go to Denmark and slap OP.
