Thread: [Transparent Taskbar in Windows 10 | Tutorial](#)

DENIZ - July 6, 2018, 5:01 pm

Hey people, in this tutorial I am going to show you, how to get your taskbar fully transparent with a simple mod.

It will look like this:Spoiler ([Click to View](#))

Notice how clean it looks? To get your taskbar transparent you simply have to download [TranslucentTB](#).

Simply follow the instructions on the GitHub page, it doesn't even take more than 5 minutes.

I haven't noticed any slowdowns on my system since using it, so I would definitely recommend using it. If you have any questions, feel free to ask them below!

Looks awesome , already installed it.

Aadgjmptw72 - July 6, 2018, 5:25 pm

This looks pretty cool, ima install it

lllllllllll - July 8, 2018, 3:21 am

Cool share. Going to install it later when I'm home.

I have achieved similar results with rainmeter, just saying in case someone is already using it and didn't know

AeroBlue - July 8, 2018, 3:28 pm

Wow this is really cool, downloading it right now!

LoveOverFear - July 9, 2018, 5:36 pm

Gonna try this out as it looks neat, thanks op :)
