Thread: [Help connecting to HF's XMPP Server](#)

Chief - July 7, 2018, 9:42 am

I've been trying for about an hour now. I have to correct info in place and I have OTR.

Anyone here able to provide some assistance? Only reason this is posted her is because it's HF's own server.

Are you using the IP because it changed?

Chief - July 7, 2018, 9:46 am

I've used "192.99.145.216" and "hackforums.im" in the domain and neither is working.

hackforums.im is the old service, which was discontinued a while ago, you're looking for hacker.im.

<https://hacker.im/>

You're welcome.

Sweet fuck I'm dumb. I've been trying to create one via the <https://hackforums.net/hfim.php> page.
Thank you so much!

Ah crap, we still need to fix that and sort it out. I think we're combining the services.
