Thread: [EARN \\$1,000+ A MONTH PASSIVE INCOME - REQUIRES SIZABLE INVESTMENT
SUCCESS OR REFUND](#)

John F. Kennedy - July 7, 2018, 5:28 pm

Do you want to earn \$1,000+ a month passively?

This means you can spend your time doing other things such as drop shipping, or selling your eBook on HF while you earn money by doing basically no work!

REQUIREMENTS:

This is a real-life investment, and not an online money making scheme. You will require an investment of anywhere from between \$5k to \$8k to do this.

This method is a very low risk, and some people in the business even call it risk-free.

You must be 18 or older to do this.

This is not USA only, but my guide was written specifically for those in the USA.

NOTE: There is no guarantee you can do this in your country besides the USA. I'm not too sure with how regulations work in every single country besides the USA.

Please PM me your country before purchasing and I will let you know if this is available in your area.

I will be selling 15 copies of this, with each copy increasing by \$100.

Payments are in BTC only, no refunds will be given. You cannot chargeback, as you are obviously paying with BTC. Leaking this method is a violation of the terms of service, and you will no longer be provided with any sort of support/customer service.

I will help you out with your investment as needed and help you get set up.

Your earning potential is \$1,000 a month, or more PER \$5k-\$8k you invest.

If for example, you invested \$10k-\$16k, you can be making \$1,000 a month. There is no real limit to it, and you can expand this as you go.

This method will not be saturated, and will probably not fail you for at least 50 years or more. You can literally have lifetime passive income if you take this seriously. Mostly older gentlemen do this method and do not share it with anyone, as it makes them tons of money. They have been in this business for 20-30 years, and do not want to let others in on the cash.

This method is 100% legal and it is completely whitehat.

Method is one that I've seen online, not only here, but other places as well. I've even seen it here discussed openly outside of the marketplace. With that said, I wouldn't say its super common knowledge like some other things around here.

Method does involve a sizable investment like OP stated. From what I've seen, you're looking at about \$4000-\$5000 entry. Now about \$2000 of that is something that can be recovered at any time, kind of like floating money, so if you absolutely fail you're out about \$2000 (Some of which could be recovered as well.)

From what I've seen online of other people doing this, you should realistically expect \$250 ish a month per investment. Claims of \$1000 seem pretty high to me. Once again, I'm going off what others have said from what I can find, but unless OP can show me proof of his own earnings, I find that \$1000 a month exaggerated. So at \$250 a month, you're looking at close to a year to regain your investment minus the floating money. This can 100% be scaled, but will require additional \$4000+ investments each time.

This is a real world business, and will require you do to real world work, probably a couple hours each week. If you expand, it will require more of your time. At this point it is possible for you to automate things, but I would wait until you have expanded because it will cut into your profits and seems pointless to do so if you're just starting out.

Now there's good news and bad news about getting into this business. Good news is that it will be around for years to come, that's for sure. Bad news is that there is competition. As OP said, "Mostly older gentlemen do this method and do not share it with anyone, as it makes them tons of money. They have been in this business for 20-30 years, and do not want to let others in on the cash." Like I said earlier this is a real world business and it might take some time to get your foot in the door.

I personally think the price for this needs to be lowered, \$150 starting is too much to me. Also, I don't see a need to increase the price for each copy sold. Your main concern with competition is going to be those already in the business, not the people who buy it here on HF all over the US, so it's not really something that needs to get more and more exclusive.

Overall this will make you money. I think the biggest issue you'll face is competition from people already doing this, followed by the obvious large investment. Unless you have a large chunk of

money (Like 10's of thousands laying around) to invest into this to get a solid start, I think it might be a difficult method to get going.

If you have further input on anything I mentioned just let me know.

Thanks for giving me a chance to review.

No you are not selling a product with this method really.

Why would one buy that if it's not guaranteed to work in your country?

Also looking to know the answer to this.

For the copy 1 that was sold is there ever going to be a review from them, interested in seeing what they think about it.

Pretty much for the reason he said, he only has experience in the US. It has the possibility of working worldwide, but I can't guarantee how well/if at all/exactly what would go into it.

I think I left a pretty detailed review above if you're looking for one.

RAT - July 24, 2018, 2:29 am

Buy & find out if it works for you :) No guarantees... But maybe it will (50/50) & then you can use the method. Some basic resesarch from the author about other markets rather than the U. S. would be fine.

Honestly the best review I have ever seen on HF. Good stuff! On my own personal side note, does this have anything to do with real estate?

Haha I appreciate it. Since most ebooks around here are trash and all the sellers just vouch for each other, I like to actually take time and post good reviews so people don't get fucked over. I'll let OP answer any questions about what the method is/isn't.

Hello gentlemen! I understand your concern.

Please PM me your country and I will get back to you with some research and see if you would be eligible to do this in your country.

I can not guarantee a review from the buyer as that's not up to me. It's up to the buyer whether he wants to review this or not.

Thanks!

Carbohydrates - July 26, 2018, 1:35 am

might be interested. Is it a minimum \$4-\$8k to invest or could I say start w/ \$2k and make less.
As stated in the vouch \$4k would realistically return \$250 a month or so, so could I do \$2k and say do \$125/m
I have enough to go all in \$4-\$8k, but rather start smaller to test the waters.
How many hours of work per day would you say?
This is real life, so do I have to have real life encounters w/ people purchasing whatever I am selling?

I have bought one of these. I will say I do see the potential in this. Just know for the very first investment you will likely have to invest an extra \$250-\$500. But after the first none thereafter. This is also not instant money, and in fact, the ROI is roughly 8% I'd say a month, give or take. That's good. I have not started this method, but I do plan too. The first month or two is a process, but after that the next investments should come quicker and easier.
