Thread: [\[READ\] Please Read \[READ\]](#)

Gibson - August 3, 2010, 4:46 am

Hey guys,

(PMing is fine but not thread posting! ?)

This is about the number of threads asking if they can have one your victims. the reason Im saying this is

because i feel obliged to comment saying something like "Test it on yourself in a sandbox, on an old computer

or get a friend to test it on themselves.

And this is what Im going to say to all of you People arnt that nice!

on average people have about 5-10 victims and they are not going to just hand one over that they spent

so much time trying to get for nothing!

(i know this from personal experience i used to ask people for victims)

But before you even think about making a new thread saying "Can someone please give me a victim???"

think about this, you are spamming up these forums with useless threads that will not accomplish Anything!

(but if you still REALLY want someone else's victim then just PM them and be polite, say please and thank you.

Please think about this thread, comment and have a nice day ?

Quote: I agree , but people have to make threads to see if someone is interested in helping , I can't just PM someone out of the blue and ask for victims ...

I fully agree with you but Im just saying that this is ruining the forum.

There should just be one big thread of people willing to help.

and people should message the people that responded to the old threads not make new ones.

I agree , but people have to make threads to see if someone is interested in helping , I can't just PM someone out of the blue and ask for victims ...

Have a great day ^_^

phlawless - August 3, 2010, 5:18 am

I agree with your point. I hate people who beg for 1 or 2 install to see if there server is working. If you want to see if it works infect your self.

Have a bump from me

Although I do hang on to crappy/slow connection vics for such requests

Good idea! and thanks for the bump! ?

stonerkraze - August 4, 2010, 8:59 am

No, this is wrong. Unless your a fucking retard you can get more than 5 to 10 victims. Im at a super
low right now and I have 55 victims online. If anyone would like a victim to try or even have, I will go
on TV and 'update' on a victim, meaning you keep the victim and i no longer have him.

I am tired of people saying HF isn't a nice forum. Some of us actually want to help the others, so
please, shut up.

13uNkNoWn - August 4, 2010, 11:05 am

yeah, if I had the victims I wouldn't mind giving them to people who are testing things...I'd hope for
that help at times, as I don't want to fuck up MY computer with ani's and all the disables and I dont
want it spamming the people in MY friends lists to auto spread... if I test it on myself without those
features then who's to say it doesn't corrupt just when those features are enabled... not everyone
has a PC that can run a virtual machine, and were talking about testing things which were made to
have ANTI VM's and AVs and Firewalls and all that crap...

you paid for these forums, but nobody made you, and it doesn't make you better than anyone else
or give you the right to tell anyone else what to do.. or how to post... it get annoying to you? go
somewhere else, or use the search feature...

or better yet, do something more useful and post it as a suggestion for the site that the mods or
someone make a sticky thread for people requesting or offering victims, but do NOT try and get all
high and mighty, and telling people what to do (like I just did... BAD krytical BAD) because you will
most likely look like a douche... and start some sort of flame war...

and for someone posting about spam and whatnot and these forums...

your breaking the rules...

Code 2. No short low quality posts like "bump", "lol", "roflmao", "thanks" and any repeated characters to defeat the min character count.
and under the etiquette

Code 3. Don't double post. That's when you post one after another instead of editing your existing first post.

Sorry if i have low quality posts but I just get a bit annoyed
by seeing threads like "PLEASE GIVE ME A VICTIM"

Im sorry if you misunderstood what i was trying to say here.

~Gibson

13uNkNoWn - August 4, 2010, 11:57 am

I understand the thought,

there are just more useful ways to go about getting what you want done, than posting trying to tell people to stop doing something... =/ no need to apologize to me, I'm no greater than you or anyone else on here either, I hold no power, just my opinion

Gibson - August 4, 2010, 12:12 pm

Hows this for the one big thread about installs? :) :
Hey guys!

I made a thread about all the threads regarding Installs Yesterday and To stop there being so many threads on this, Im making one big one!

Please Post here if you are willing to share some Installs/victims and please post here if you want Installs/victims We will all help each other out ;)

Hopefully this will resolve the issue.
Thanks!

~Gibson
