Thread: [AVcheck.Net||No distribution|| 0.1 Per Scan||](#)

VENI - July 8, 2018, 10:04 pm

Hello everyone this is not my scanner but i have contacted this website owner. He was kind enough to give me 10 free scans but anyway this website scans with 21 AV engines and does not distribute files.

Av's:

- Adaware Antivirus 12
- AhnLab V3 Internet Security
- Alyac Internet Security
- Avast Internet Security
- AVG AntiVirus
- Avira Antivirus 2018
- Bitdefender Total Security 2018
- BullGuard Antivirus
- ClamAV
- Comodo Antivirus
- Dr.Web Security Space 11
- FortiClient Antivirus
- Kaspersky Internet Security
- McAfee Endpoint Protection
- Malwarebytes Anti-Malware
- Nano Antivirus
- ESET NOD32 Antivirus
- Panda Antivirus
- Sophos Home
- Webroot SecureAnywhere
- Windows 10 Defender
- ZoneAlarm Antivirus

You can even select which av you dont want to scan with. I do recommend this website because it is very cheap and the support is really fast and very nice towards people. The scans take about 10 seconds which is very quick and it displays all of your history of your scans.

Test scan with Babylon Rat: <https://avcheck.net/id/tCFx8AMuJSNg>

Enjoy

Nice to see new scanners , currently I use Scanmybin but will probably migrate to this one or Antiscan as it provides 25 AV's .
