Thread: [iOS Downgrade 11.4 to 11.3.1](#)

sAVITAR - July 9, 2018, 4:48 am

So, I really want to jailbreak my iPhone but I can't restore to 11.3.1 (I'm running on 11.4) through iTunes anymore since it isn't supported.

Does anyone know another way to downgrade it?

I got the file from the IPSW website but can't do anything with it atm.

sHAY - July 9, 2018, 4:48 am

There's no way, you gotta wait til next jailbreak.

daymon - July 9, 2018, 4:51 am

Nope, not possible. You can't downgrade after the signing period is over.

Nick (Name) - July 9, 2018, 5:52 am

Unless you saved blobs for iOS 11.3.1 for that specific device, then there's no way of downgrading.

madTRiiKs - July 9, 2018, 3:15 pm

you might be in some luck. All though you can't downgrade due to 11.3.1 not being signed. 11.4 beta 3 is still being signed and can be jailbroken. So if you want to jailbreak you need to get on 11.4 beta 3

I can't manage to go to 11.4 BETA, iTunes gives me a 3194 error.

Wings of Redemption - July 10, 2018, 11:59 pm

Check <https://www.reddit.com/r/jailbreak/>. they have helped me so many times.

EDIT: The betas are only being signed for the iPhone 8, 8+ and X
