Thread: [I'm sharing my passion - My new website](#)

Waqar Rasheed - July 9, 2018, 11:29 pm

Hello Everyone. This is my Website. [LandingSqueezePage.Com](#)

Basically, I'm a PSD Designer with a decent collection of a portfolio. I'm providing these services here.

- > [Landing Page Design](#) (PSD Design + HTML/CSS)
- > Web Development (PSD to HTML)
- > Branding (Logo, Flyer, Social Media Toolkit, Business Cards etc)

It's a WordPress website. what do you guys think of the theme, layout, and logo etc?

Please check and let me know if you feel anything to be improved. ?

text seems a little cluttered, just too much of it and small font sizes. noticing it particularly on the services page

also portfolio page is empty

why not use one of your landing pages on the site if you're so confident in it? that struck me as odd immediately.

Maybe use some transitions on hover. Personally i don't like when a hover effect happens in a flash, i like seeing that smooth transition :D

EDIT: OH Also the header opacity. trips me out. Makes me think something will popup for some reason. if header is on top of page maybe just clear it completely and fadein on scroll. If you do that make sure to change font color.

The domain is awful. The design is awful. It honestly looks like a spam site.

The logo is nice.

one more thing!!

i just realized your back to top button is hidden under the silly chat thing.
