Thread: [How does your lockscreen/homescreen look?](#)

sHAY - July 10, 2018, 4:22 pm

With the new release of Electra and a lot more devices are able to jailbreak how does your setup look?

Going for a very minimal and clean look.

Now see here's a sexy phone, unlike that other one in the lounge.

8/10 OP. I especially love the grass behind the dock.

Im currently rocking Lotus on my home screen, and my lock screen is still original. I'm going to change my lock screen soon.

What tweaks or widgets are you using for your lockscreen? If they're from a 3rd party source link it!

FiftyTwo - July 11, 2018, 11:57 am

Will jailbreaking an iPhone 6S 16GB on iOS 11.2.6 decrease performance tremendously?

I haven't jailbroken since iOS 9 I believe, and I did love the tweaks that I had but my phone at the

time did become slower.

Night - July 11, 2018, 12:23 pm

The quality looks kinda of bad on the pics. But it is very nice quality on my phone.

I really love your homescreen man. Looks very sleek.

Think I'm going to jailbreak my ipad air 2 later on. I've got a 5s jailbroken, but can't run some apps when I have the jailbreak active..and sadly it's a tethered jailbreak.

Btw what theme is that? ?

Theme for the home screen is Insight and the lock screen is LockPlus Pro.

Everything looks good except for your lock screen. I don't know why do people keep using that tweak. If anything, it looks to me like the buttons are bugged..

I sorta just fuck with it. I don't know why, lol, but either way I probably won't be typing in my passcode much anyways.
