I personally vouch for this user, and the partner he's working with. Both are clients of mine and I've never had issues with either of them :)

hi i bought this. Can you add proxys and random messages? Once you get flagged your ghosted, and simply spamming other spammers wasting credits.

terrahhigh - July 12, 2018, 2:55 am

it doesnt work for me. i bought a VPS server... tried to use it with VPN... it always gives an error about being banned from omegle.

Your IP is banned from Omegle. Please use a VPN or something of the sort.

V2 is coming out soon with a reverse-rotating [daisychain like] proxy service.

Proxies come out in v2, and yes you choose your own message.

Also that 2nd part isnt true with our current system.

I bought this when Big Benim was the project owner, do i still get updates and stuff or is this completely separate now?

The owner passed it down to another developer, so yes you have to rebuy, but there is another version coming out which is going to be way better :)

Shaorin - July 13, 2018, 5:00 pm

Can you integrate capmonster instead of using 2captcha? cause it's a lot cheaper since it offers unlimited recaptcha solves for a yearly subscription where as 2captcha you pay for every solved captcha

didn't think there was a way for it to be captchaless except for having residential proxies (more expensive than datacenter proxies) anyway let me know when you release the bot with captchaless then i'll definitely buy

Reverse proxy was our solution.

4um123, thread will be closed if the guy that wanted me to post doesn't reply with your order within 24 hours. If you feel to start a case on paypal if you used that to purchase. Feel free to.

I suggest no purchases to be made until this is resolved, thanks.
